INDEPENDENT AUDITOR'S REPORT

To the Shareholders of Abu Dhabi Commercial Bank P.J.S.C. Abu Dhabi, U.A.E.

Report on the consolidated financial statements

We have audited the accompanying consolidated financial statements of Abu Dhabi Commercial Bank P.J.S.C. and its subsidiaries (together referred to as the "Bank"), which comprise the consolidated statement of financial position as at December 31, 2009, and the consolidated income statement, other comprehensive income, statement of changes in equity and consolidated statement of cash flows for the year then ended, and a summary of significant accounting policies and other explanatory notes as set out in pages 3 to 104.

Management's responsibility for the consolidated financial statements

Management of the Bank is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with International Financial Reporting Standards. This responsibility includes: designing, implementing and maintaining internal control relevant to the preparation and fair presentation of consolidated financial statements that are free from material misstatement, whether due to fraud or error; selecting and applying appropriate accounting policies; and making accounting estimates that are reasonable in the circumstances.

Auditor's responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audit. We conducted our audit in accordance with International Standards on Auditing. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the Bank's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Bank's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

Deloitte.

INDEPENDENT AUDITOR'S REPORT (Continued)

Auditor's responsibility (continued)

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the consolidated financial statements present fairly in all material respects the financial position of the Bank as of December 31, 2009, and of its financial performance and its cash flows for the year then ended in accordance with International Financial Reporting Standards.

Report on other legal and regulatory requirements

Also, in our opinion, proper books of account are maintained by the Bank, and the information included in the Board of Directors' report is in agreement with the books of account. We have obtained all the information and explanations which we considered necessary for the purpose of our audit. According to the information available to us, there were no contraventions of the U.A.E. Federal Commercial Companies Law No. (8) of 1984 (as amended) or the Articles of Association of the Bank which might have a material effect on the financial position of the Bank or its financial performance.

Increase/(decrease) in cash and cash equivalents	4,229,810	(2,707,780)	1,151,595
Cash and cash equivalents at the beginning of the year	15,144,109	17,851,889	4,123,090
Cash and cash equivalents at the end of the year (Note 35)	19,373,919	15,144,109	5,274,685

1 Activities

Abu Dhabi Commercial Bank P.J.S.C. ("ADCB") is a public joint stock company with limited liability incorporated in the Emirate of Abu Dhabi, United Arab Emirates (U.A.E.). ADCB carries on retail banking, commercial banking, investment banking, Islamic banking, brokerage and asset management activities through its network of forty seven branches in the U.A.E., two branches in India, its subsidiaries, joint ventures and associates.

The registered head office of ADCB is at Abu Dhabi Commercial Bank Head Office Building, Salam Street, plot C- 33, Sector E-11, P. O. Box 939, Abu Dhabi, U.A.E.

ADCB is registered as a public joint stock company in accordance with the U.A.E. Federal Commercial Companies Law No. (8) of 1984 (as amended).

2 Adoption of new and revised standards

2.1 Standards affecting presentation and disclosure

The following new and revised Standards have been adopted in the current period in these financial statements. Details of other Standards and Interpretations adopted but that have had no effect on the financial statements are set out in section 2.2.

• IAS 1 (as revised in 2007) Presentation of Financial Statements IAS 1 (2007) has introduced terminology changes (including revised titles for the financial statements) and changes in the format and content of the financial statements.

 Improving disclosures about Financial Instruments (Amendments to IFRS 7 Financial Instruments: Disclosures) The amendments to IFRS 7 expand the disclosures required in respect of fair value measurements and liquidity risk. The Group has elected not to provide comparative information for these expanded disclosures in the current year in accordance with the transitional reliefs offered in these amendments.

• IFRS 8 Operating Segments

IFRS 8 is a disclosure standard that has resulted in redesignation of the Group's reportable segments (see Note 38).

2 Adoption of new and revised standards (continued)

2.2 Standards and Interpretations adopted with no effect on the financial statements

The following new and revised Standards and Interpretations have also been adopted in these financial statements. Their adoption had no significant impact on the amounts reported in these financial statements but may affect the accounting for future transactions or arrangements.

- Amendments to IFRS 2 Share-based Payment - Vesting Conditions and Cancellations
- IAS 23 (as revised in 2007) Borrowing Costs
- Amendments to IAS 32 Financial Instruments: Presentation and IAS 1 Presentation of Financial Statements – Puttable Financial Instruments and Obligations Arising on Liquidation
- IFRIC 13 Customer Loyalty Programmes
- IFRIC 15 Agreements for the Construction of Real Estate
- IFRIC 16 Hedges of a Net Investment in a Foreign Operation
- IFRIC 18 Transfers of Assets from Customers (adopted in advance of effective date of transfers of assets from customers received on or after 1 July 2009)

The amendments clarify the definition of vesting conditions for the purposes of IFRS 2, introduce the concept of 'non-vesting' conditions, and clarify the accounting treatment for cancellations.

The principal change to the Standard was to eliminate the option to expense all borrowing costs when incurred.

The revisions to IAS 32 amend the criteria for debt/equity classification by permitting certain puttable financial instruments and instruments (or components of instruments) that impose on an entity an obligation to deliver to another party a pro-rata share of the net assets of the entity only on liquidation, to be classified as equity, subject to specified criteria being met.

The Interpretation provides guidance on how entities should account for customer loyalty programmes by allocating revenue on sale to possible future award attached to the sale.

The Interpretation addresses how entities should determine whether an agreement for the construction of real estate is within the scope of IAS 11 *Construction Contracts* or IAS 18 *Revenue* and when revenue from the construction of real estate should be recognised.

The Interpretation provides guidance on the detailed requirements for net investment hedging for certain hedge accounting designations.

The Interpretation addresses the accounting by recipients for transfers of property, plant and equipment from 'customers' and concludes that when the item of property, plant and equipment transferred meets the definition of an asset from the perspective of the recipient, the recipient should recognise the asset at its fair value on the date of the transfer, with the credit recognised as revenue in accordance with IAS 18 Revenue.

2 Adoption of new and revised standards (continued)

2.2 Standards and Interpretations adopted with no effect on the financial statements (continued)

• Improvements to IFRSs (2008)

Amendments to IFRS 5, IAS 1, IAS 16, IAS 19, IAS 20, IAS 23, IAS 27, IAS 28, IAS 29, IAS 31, IAS 36, IAS 38, IAS 39, IAS 40 and IAS 41 resulting from the May and October 2008 *Annual Improvements to IFRSs* majority of which are effective for annual periods beginning on or after 1 January 2009.

2.3 Standards and Interpretations in issue not yet effective

At the date of authorisation of these financial statements, the following new and revised Standards and Interpretations were in issue but not yet effective:

New Standards and amendments to Standards:	Effective for annual periods beginning on or after
• IFRS 1 (revised) First time Adoption of IFRS and IAS 27 (revised) Consolidated and Separate Financial Statements – Amendment relating to Cost of an Investment in a Subsidiary, Jointly Controlled Entity or Associate	1 July 2009
• IFRS 3 (revised) <i>Business Combinations</i> – Comprehensive revision on applying the acquisition method and consequential amendments to IAS 27 (revised) <i>Consolidated and Separate Financial Statements</i> , IAS 28 (revised) <i>Investments in Associates</i> and IAS 31 (revised) <i>Interests in Joint Ventures</i>	1 July 2009
• IAS 39 (revised) Financial Instruments: Recognition and Measurement – Amendments relating to Eligible Hedged Items(such as hedging Inflation risk and Hedging with options)	1 July 2009
• IFRS 1 (revised) <i>First time Adoption of IFRS</i> – Amendment on additional exemptions for First-time Adopters	1 January 2010
• IFRS 2 (revised) <i>Share-based payment</i> – Amendment relating to Group cash-settled Share-based payments	1 January 2010
• IAS 32 (revised) Financial Instruments: Presentation – Amendments relating to classification of Rights Issue	1 February 2010
• IAS 24 Related Party Disclosures – Amendment on disclosure requirements for entities that are controlled, jointly controlled or significantly influenced by a Government	1 January 2011
• IFRS 9 Financial Instruments: <i>Classification and Measurement</i> (intended as complete replacement for IAS 39 and IFRS 7)	1 January 2013
• Amendments to IFRS 2, IFRS 5, IFRS 8, IAS 1, IAS 7, IAS 17, IAS 18, IAS 36, IAS 38 and IAS 39 resulting from April 2009 <i>Annual Improvements to IFRSs</i> .	Majority effective for annual periods beginning on or after 1 January 2010

2 Adoption of new and revised standards (continued)

2.3 Standards and Interpretations in issue not yet effective (continued)

N	ew Interpretations and amendments to Interpretations:	Effective for annual periods beginning on or after		
•	IFRIC 17: Distributions of Non-cash Assets to Owners	1 July 2009		
•	IFRIC 19: Extinguishing Financial Liabilities with Equity Instruments	1 July 2010		
•	Amendment to IFRIC 14: IAS 19: The limit on a defined Benefit Asset, Minimum Funding Requirement and their interaction	1 January 2011		
•	Amendment to IFRIC 16: Hedges of a Net Investment in a Foreign Operation	1 July 2009		
•	Amendment to IFRIC 9 (revised): Reassessment of Embedded Derivatives relating to assessment of embedded derivatives in case of reclassification of a financial asset out of the 'FVTPL' category	1 July 2009		

The directors anticipate that these amendments will be adopted in the Bank's financial statements for the period beginning January 1, 2010 or when applicable. The directors have not yet had an opportunity to consider the potential impact of the adoption of these new standards and amendments.

3 Basis of preparation

3.1 Statement of compliance

The consolidated financial statements have been prepared on going concern basis and in accordance with International Financial Reporting Standards (IFRS) issued by the International Accounting Standards Board (IASB) and applicable requirements of the Laws of the U.A.E..

IFRSs comprise accounting standards issued by IASB and its predecessor body as well as interpretations issued by the International Financial Reporting Interpretations Committee (IFRIC) and its predecessor body.

As required by the Securities and Commodities Authority of the U.A.E. ("SCA") Notification No. 2624/2008 dated October 12, 2008, the Bank's exposure in Cash and balances with Central banks, Due from banks and Investment securities outside the U.A.E. have been presented under the respective notes.

3 Basis of preparation (continued)

3.2 Measurement

The consolidated financial statements have been prepared on the historical cost basis except as specified below. Historical cost is generally based on the fair value of the consideration given in exchange for assets.

- derivative financial instruments are measured at fair value
- financial instruments at fair value through profit or loss are measured at fair value
- available-for-sale financial assets are measured at fair value
- investment properties are measured at fair value
- recognised financial assets and financial liabilities designated as hedged items in qualifying hedge relationships are adjusted for changes in fair value attributable to the risk being hedged.

3.3 Presentation of information

The consolidated financial statements are prepared and presented in United Arab Emirates Dirhams (AED), which is the Bank's functional and presentation currency. Except as indicated, financial information presented in AED has been rounded to the nearest thousand.

The US Dollar (US\$) amounts are presented for the convenience of the reader.

3.4 Use of estimates and judgements

The preparation of financial statements requires management to make judgements, estimates and assumptions that affect the application of the accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised and in any future periods affected.

Information about significant areas of estimation uncertainty and critical judgements in applying accounting policies that have the most significant effect on the amounts recognised in the consolidated financial statements are described in Note 5.

3 Basis of preparation (continued)

3.5 Consolidation

The consolidated financial statements incorporate the financial statements of Abu Dhabi Commercial Bank P.J.S.C. and its subsidiaries (collectively referred to as the "Bank") as set out in Note 48. Control is achieved when the Bank has the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities, generally conferred by holding a majority of voting rights. Subsidiaries are consolidated from the date that the Bank gains control until the date that control ceases. The purchase method of accounting is used to account for the acquisition of subsidiaries by the Bank. The cost of acquisition is measured at the fair value of the consideration given at the date of exchange, together with costs directly attributable to that acquisition. The acquired identifiable assets, liabilities and contingent liabilities are measured at their fair values at the date of acquisition. Any excess of the cost of acquisition over the fair value of the Bank's share of the identifiable assets, liabilities and contingent liabilities acquired is recorded as goodwill. If the cost of acquisition is less than the fair value of the Bank's share of the identifiable assets, liabilities and contingent liabilities of the business acquired, the difference is recognised immediately in the consolidated income statement.

In the context of Special Purpose Entities (SPEs), the following circumstances may indicate a relationship in which, in substance, the Bank controls and consequently consolidates an SPE:

- the activities of the SPE are being conducted on behalf of the entity according to its specific business needs so that the Bank obtains benefits from the SPE's operation;
- the Bank has the decision-making powers to obtain the majority of the benefits of the activities of the SPE or, by setting up an 'autopilot' mechanism, the entity has delegated these decision-making powers;
- the Bank has the right to obtain the majority of the benefits of the SPE and therefore may be exposed to risks incident to the activities of the SPE; or
- the Bank retains the majority of the residual or ownership risks related to the SPE or its assets in order to obtain benefits from its activities.

The assessment of whether the Bank has control over an SPE is carried out at inception and normally no further reassessment of control is carried out in the absence of changes in the structure or terms of the SPE, or additional transactions between the Bank and the SPE except whenever there is a change in the substance of the relationship between the Bank and an SPE.

The Bank manages and administers assets held in unit trusts on behalf of investors. The financial statements of these entities are not included in the consolidated financial statements except when the Bank controls the entity. Information about the Funds managed by the Bank is set out in Note 47.

The consolidated financial statements also include the attributable share of the results and reserves of joint ventures and associates.

The financial statements of the entities included in consolidation are prepared for the same reporting period as that of the Bank, using consistent accounting policies. All significant inter-company balances, income and expense (except for foreign currency transaction gains or losses) items are eliminated on consolidation. Unrealised losses are eliminated in the same way as unrealised gains, but only to the extent that there is no evidence of impairment.

3 Basis of preparation (continued)

3.5 Consolidation (continued)

Non-controlling interest in subsidiaries are identified separately from the Bank's equity therein. The interest of non-controlling shareholders is measured as the non-controlling interest's proportionate share of the fair value of the acquiree's identifiable net assets. Subsequent to acquisition, the carrying amount of non-controlling interests is the amount those interests at initial recognition plus the non-controlling interest's share of subsequent changes in equity. Total comprehensive income is attributed to non-controlling interests even if this results in the non-controlling interests having a deficit balance.

Non-controlling interest represents the portion of profit or loss for the year and portion of net assets of consolidated subsidiaries not owned directly or indirectly by the Bank and are identified separately under the headings 'Non-controlling interest' in the consolidated financial statements, except for losses attributable to the non-controlling shareholders in Abu Dhabi Risk and Treasury Solutions L.L.C., as stated in Note 48.

4 Significant accounting policies

4.1 Due from banks

Due from banks are stated at cost less any amounts written off and allowance for impairment.

4.2 Loans and advances, net

Loans and advances to banks and customers include loans and advances originated by the Bank which are not classified either as available-for-sale or as held for trading or designated at fair value through profit and loss. They are non-derivative financial assets originated or acquired by the Bank with fixed or determinable payments that are not quoted in an active market and that the Bank does not intend to sell immediately or in the near term. They are recognised when cash is advanced to borrowers and derecognised when either borrowers repay their obligations, or the loans are sold or written off, or substantially all the risks and rewards of ownership are transferred. They are initially recorded at fair value plus any directly attributable transaction costs and are subsequently measured at amortised cost using the effective interest method, less impairment losses.

Loan impairment

Losses for impaired loans and advances are recognised promptly when there is objective evidence that impairment of a loan or portfolio of loans has occurred. Impairment allowances are calculated on individual loans and on group of loans assessed collectively. Impairment losses are recorded as charges to the income statement. The carrying amount of impaired loans on the statement of financial position is reduced through the use of impairment allowance account. Losses expected from future events are not recognised.

4 Significant accounting policies (continued)

4.2 Loans and advances, net (continued)

Loan impairment (continued)

Individually assessed loans and advances

Individually assessed loans mainly represent individually significant corporate and commercial loans which are assessed individually in order to determine whether there exists any objective evidence that a loan is impaired. The Bank assesses whether there is any objective evidence that a loan is impaired for each of these loans on a case-by-case basis at each statement of financial position date.

For those loans where objective evidence of impairment exists, impairment losses are determined considering the following factors:

- the Bank's aggregate exposure to the customer;
- the viability of the customer's business model and their capacity to trade successfully out of financial difficulties and generate sufficient cash flow to service debt obligations;
- the amount and timing of expected receipts and recoveries;
- the likely dividend available on liquidation or bankruptcy;
- the extent of other creditors' commitments ranking ahead of, or pari passu with, the Bank and the likelihood of other creditors continuing to support the company;
- the realisable value of security (or other credit mitigants) and likelihood of successful repossession;
- the likely deduction of any costs involved in recovery of amounts outstanding;

The amount of impairment loss is measured as the difference between the loan's carrying amount and the present value of estimated future cash flows excluding future credit losses that have not been incurred, including amounts recoverable from guarantees and collateral, discounted at the loan's original effective interest rate. The amount of the loss is recognised using an allowance account and is included in the consolidated income statement line impairment allowances. If a loan has a variable interest rate, the discount rate for measuring any impairment loss is the current effective interest rate determined under the contract.

Collectively assessed loans and advances

Impairment is assessed on a collective basis in two circumstances:

- to cover losses which have been incurred but have not yet been identified on loans subject to individual assessment; and
- for homogenous groups of loans that are not considered individually significant.

- 4 Significant accounting policies (continued)
- 4.2 Loans and advances, net (continued)

Loan impairment (continued)

Incurred but not yet identified

Individually assessed loans for which no evidence of loss has been specifically identified on an individual basis are grouped together according to their credit risk characteristics based on industry, product or loan rating for the purpose of calculating an estimated collective loss. This reflects impairment losses that the Bank may have incurred as a result of events occurring before the statement of financial position date, which the Bank is not able to identify on an individual loan basis, and that can be reliably estimated. As soon as information becomes available which identifies losses on individual loans within the group of the customer, those loans are removed from the group of the customer and assessed on an individual basis for impairment.

The collective impairment allowance is determined after taking into account:

- historical loss experience in portfolios of similar credit risk characteristics (for example, by industry sector, loan grade or product);
- the estimated period between impairment occurring and the loss being identified and evidenced by the establishment of an appropriate allowance against the individual loan; and
- management's experienced judgement as to whether current economic and credit conditions are such that the actual level of inherent losses at the statement of financial position date is likely to be greater or less than that suggested by historical experience.

The period between a loss occurring and its identification is estimated by management for each identified portfolio.

Homogenous groups of loans and advances

Statistical methods are used to determine impairment losses on a collective basis for homogenous groups of loans that are not considered individually significant, because individual loan assessment is impracticable. Losses in these groups of loans are recorded on individual basis when individual loans are written off, at which point they are removed from the group.

Impairment of retail loans is calculated by applying a formula approach which allocates progressively higher loss rates in line with the overdue installment date.

Write-off of loans and advances

A loan and advance (and the related impairment allowance) is normally written off, either partially or in full, when there is no realistic prospect of recovery of the principal amount and, for a collateralised loan, when the proceeds from realizing the security have been received.

4 Significant accounting policies (continued)

4.2 Loans and advances, net (continued)

Loan impairment (continued)

Reversal of impairment

If the amount of an impairment loss decreases in a subsequent period, and the decrease can be related objectively to an event occurring after the impairment was recognised, the excess is written back by reducing the loan impairment allowance account accordingly. The write-back is recognised in the consolidated income statement in the period in which it occurs.

Renegotiated loans

Retail loans, which are subject to collective impairment review and whose terms have been renegotiated, are no longer considered to be past due and consequently considered impaired only when the minimum required number of payments under the new arrangements have not been received and the borrower has not complied with the revised terms and conditions.

Loans subject to individual impairment assessment, whose terms have been renegotiated, are subject to continuous review to determine whether they remain impaired or are considered to be past due depending upon the borrower complying with the revised terms and conditions and making the minimum required payments for the loans to be moved to performing category.

Loans that are either subject to collective impairment assessment or are individually significant and whose terms have been renegotiated are no longer considered to be past due but are treated as new loans for measurement purposes once the minimum number of payments required under the new arrangements have been received. Loans subject to individual impairment assessment, whose terms have been renegotiated, are subject to ongoing review to determine whether they remain impaired or should be considered past due. The carrying amount of loans that have been classified as renegotiated loan and this classification is retained until maturity or derecognition.

4.3 Collateral pending sale

The Bank occasionally acquires real estate and other collaterals in settlement of certain loans and advances. Such real estate and other collaterals are stated at the lower of the net realisable value of the loans and advances and the current fair value of such assets less costs to sell at the date of acquisition. Gains or losses on disposal and unrealised losses on revaluation are recognised in the consolidated income statement.

4 Significant accounting policies (continued)

4.4 Trading and Investment Securities

Trading and investment securities are initially measured at fair value plus, in case of investment securities not at fair value through profit or loss, incremental direct transaction costs, and subsequently accounted for based on their classification.

Bank's investments are classified into the following categories depending on the nature and purpose of the investment:

- i) Trading securities which include investments at fair value through profit or loss (FVTPL)
- ii) Investment securities which include available for sale (AFS) and held-to-maturity investments (HTM)

Fair value through profit or loss (FVTPL)

Financial assets are classified as at FVTPL when the financial asset is either held for trading or it is designated as at FVTPL.

A financial asset is classified as held for trading if:

- It has been acquired principally for the purpose of selling it in the near term; or
- On initial recognition it is part of a portfolio of identified financial instruments that the Bank manages together and has a recent actual pattern of short-term profit-taking; or
- It is a derivative that is not designated and effective as a hedging instrument.

A financial asset other than a financial asset held for trading may be designated as at FVTPL upon initial recognition if:

- Such designation eliminates or significantly reduces a measurement or recognition inconsistency that would otherwise arise; or
- The financial asset forms part of a group of financial assets or financial liabilities or both, which
 is managed and its performance is evaluated on a fair value basis, in accordance with the Bank's
 documented risk management or investment strategy, and information about the grouping is
 provided internally on that basis; or
- It forms part of a contract containing one or more embedded derivatives, and IAS 39 Financial Instruments: Recognition and Measurement permits the entire combined contract (asset or liability) to be designated as at FVTPL.

Financial assets at FVTPL are stated at fair value, with any gains or losses arising on re-measurement recognized in income statement.

4 Significant accounting policies (continued)

4.4 Trading and Investment Securities (continued)

Held-to-maturity

Investments which have fixed or determinable payments with fixed maturities which the Bank has the intention and ability to hold to maturity, are classified as held to maturity investments.

Held-to-maturity investments are initially recognized at fair value plus any directly attributable transaction costs and are subsequently measured at amortised cost using the effective interest rate method, less any impairment losses, with revenue recognized on an effective yield basis. Amortised cost is calculated by taking into account any discount or premium on acquisition using an effective interest rate method.

Any gain or loss on such investments is recognised in the consolidated income statement when the investment is derecognised or impaired.

If there is objective evidence that an impairment on held to maturity investments carried at amortised cost has been incurred, the amount of impairment loss recognized is the difference between the assets carrying amount and the present value of estimated future cash flows, discounted at the investments original effective interest rate, with the resulting impairment loss, if any, in the consolidated income statement.

Investments classified as held to maturity and not close to their maturity, cannot ordinarily be sold or reclassified without impacting the Bank's ability to use this classification and cannot be designated as a hedged item with respect to interest rate or prepayment risk, reflecting the longer-term nature of these investments.

Available for sale

Investments not classified as either "fair value through profit or loss" or "held to maturity" are classified as "available for sale".

Available for sale investments are initially recognized at fair value plus any directly attributable transaction cost and are subsequently measured at fair value. Unquoted equity investments whose fair value cannot be measured reliably are carried at cost and tested for impairment, if any.

Gains and losses arising from changes in fair value are recognised in other comprehensive income statement and recorded in cumulative changes in fair value with the exception of impairment losses, interest calculated using the effective interest method and foreign exchange gains and losses on monetary assets, which are recognised directly in the consolidated income statement. Where the investment is disposed of or is determined to be impaired, the cumulative gain or loss previously recognised in equity in the cumulative changes in fair value is included in the consolidated income statement for the year.

Dividends on available for sale equity instruments are recognised in the consolidated income statement when the Bank's right to receive the dividends is established.

4 Significant accounting policies (continued)

4.4 Trading and Investment Securities (continued)

Available for sale (continued)

If available for sale investment is impaired, the difference between the acquisition cost (net of any principal repayments and amortization) and the current fair value, less any previous impairment loss recognised in the consolidated income statement is removed from equity and recognized in the consolidated income statement.

Once an impairment loss has been recognised on an available-for-sale financial asset, the subsequent accounting treatment for changes in the fair value of that asset differs depending on the nature of the available-for-sale financial asset concerned:

- For an available-for-sale debt security, a subsequent decline in the fair value of the instrument is recognised in the income statement when there is further objective evidence of impairment as a result of further decreases in the estimated future cash flows of the financial asset. Where there is no further objective evidence of impairment, the decline in the fair value of the financial asset is recognised directly in equity. If the fair value of a debt security increases in a subsequent period, and the increase can be objectively related to an event occurring after the impairment loss was recognised in the income statement, the impairment loss is reversed through the income statement to the extent of the increase in fair value;
- For an available-for-sale equity security, all subsequent increases in the fair value of the instrument are treated as a revaluation and are recognised directly in equity. Impairment losses recognised on the equity security are not reversed through the income statement. Subsequent decreases in the fair value of the available-for-sale equity security are recognised in the income statement, to the extent that further cumulative impairment losses have been incurred in relation to the acquisition cost of the equity security.

Reclassifications

Reclassification is only permitted in rare circumstances and where the asset is no longer held for the purpose of selling in the short term. Reclassifications are accounted for at the fair value of the financial asset at the date of reclassification.

Derecognition of investment securities

The Bank derecognizes a investment security only when the contractual rights to the cash flows from the investment expire, or when it transfers the investment and substantially all the risks and rewards of ownership of the investment to another entity. If the Bank neither transfers nor retains substantially all the risks and rewards of ownership and continues to control the transferred asset, the Bank recognises its retained interest in the asset and an associated liability for amounts it may have to pay. If the Bank retains substantially all the risks and rewards of ownership of a transferred financial asset, the Bank continues to recognize the financial asset and also recognises a collateralized borrowing for the proceeds received.

4 Significant accounting policies (continued)

4.5 Derivative financial instruments

A derivative is a financial instrument whose value changes in response to an underlying variable, that requires little or no initial investment and that is settled at a future date.

The Bank enters into a variety of derivative financial instruments to manage the exposure to interest and foreign exchange rate risks, including forward foreign exchange contracts, interest rate futures, forward rate agreements, currency and interest rate swaps and currency and interest rate options (both written and purchased).

Derivative financial instruments are initially measured at cost, being the fair value at contract date, and are subsequently re-measured at fair value. All derivatives are carried at their fair values as assets where the fair values are positive and as liabilities where the fair values are negative. Derivative assets and liabilities arising from different transactions are only offset if the transactions are with the same counterparty, a legal right of offset exists, and the parties intend to settle the cash flows on a net basis.

Derivative fair values are determined from quoted prices in active markets where available. Where there is no active market for an instrument, fair value is derived from prices for the derivative's components using appropriate pricing or valuation models.

The method of recognising fair value gains and losses depends on whether derivatives are held for trading or are designated as hedging instruments, and if the latter, the nature of the risks being hedged. All gains and losses from changes in the fair value of derivatives held for trading are recognised in the consolidated income statement under net gain in dealing in derivatives.

When derivatives are designated as hedges, the Bank classifies them as either: (i) hedges of the change in the fair value of recognised assets or liabilities or firm commitments ('fair value hedges'); (ii) hedges of the variability in highly probable future cash flows attributable to a particular risk with a recognised asset or liability, or a forecast transaction that will affect future reported net income ('cash flow hedges'); or (iii) a hedge of a net investment in a foreign operation ('net investment hedges'). Hedge accounting is applied to derivatives designated as hedging instruments in a fair value, cash flow or net investment hedge provided certain criteria are met.

At the inception of a hedging relationship, to qualify the hedge accounting, the Bank documents the relationship between the hedging instruments and the hedged items, its risk management objective and its strategy for undertaking the hedge. The Bank also requires a documented assessment, both at hedge inception and on an ongoing basis, of whether or not the hedging instruments, primarily derivatives, that are used in hedging transactions are highly effective in offsetting the changes attributable to the hedged risks in the fair values or cash flows of the hedged items. Interest on designated qualifying hedges is included in 'Net interest income'.

- 4 Significant accounting policies (continued)
- 4.5 Derivative financial instruments (continued)

Fair value hedges

Where a hedging relationship is designated as a fair value hedge, the hedged item is adjusted for the change in fair value in respect of the risk being hedged. Gains or losses on the re-measurement of both the derivative and the hedged item are recognised in the consolidated income statement. Fair value adjustments relating to the hedging instrument are allocated to the same consolidated income statement category as the related hedged item. Any ineffectiveness is also recognised in the same consolidated income statement category as the related hedged item. If the derivative expires, is sold, terminated, exercised, no longer meets the criteria for fair value hedge accounting, or the designation is revoked, hedge accounting is discontinued. Any adjustment up to that point, to a hedged item for which the effective interest method is used, is amortised in the consolidated income statement as part of the recalculated effective interest rate over the period to maturity.

Cash flow hedges

The effective portion of changes in the fair value of derivatives that are designated and qualify as cash flow hedges are recognised in consolidated statement of other comprehensive income. The ineffective part of any gain or loss is recognised immediately in the consolidated income statement. Amounts accumulated in equity are transferred to the consolidated income statement in the periods in which the hedged item affects profit or loss, in the same line of the consolidated income statement as the recognised hedged item. However, when the forecast transaction that is hedged results in the recognition of a non-financial asset or a non-financial liability, the cumulative gains or losses previously deferred in equity are transferred from equity and included in the initial measurement of the cost of the non-financial asset or non-financial liability. Hedge accounting is discontinued when the Bank revokes the hedging relationship, when the hedging instrument expires or is sold, or when a hedge no longer meets the criteria for hedge accounting. Any cumulative gains or losses recognised in equity remain in equity until the forecast transaction is recognised, in the case of a non-financial asset or a non-financial liability, or until the forecast transaction affects the consolidated income statement. If the forecast transaction is no longer expected to occur, the cumulative gains or losses recognised in equity are immediately transferred to the consolidated income statement.

Net investment hedge

Hedges of net investments in foreign operations are accounted for in a similar way to cash flow hedges. A gain or loss on the effective portion of the hedging instrument is recognised in other comprehensive income. The gain or loss relating to the ineffective portion is recognised immediately in the consolidated income statement. Gains and losses accumulated in equity are included in the consolidated income statement on the disposal of the foreign operation.

4 Significant accounting policies (continued)

4.5 Derivative financial instruments (continued)

Hedge effectiveness testing

To qualify for hedge accounting, the Bank requires that at the inception of the hedge and through its life, each hedge must be expected to be highly effective (prospective effectiveness), and demonstrate actual effectiveness (retrospective effectiveness) on an ongoing basis.

The documentation of each hedging relationship sets out how the effectiveness of the hedge is assessed. The method the Bank adopts for assessing hedge effectiveness depends on its risk management strategy.

For prospective effectiveness, the hedging instrument must be expected to be highly effective in offsetting changes in fair value or cash flows attributable to the hedged risk during the period for which the hedge is designated. For actual effectiveness to be achieved, the changes in fair value or cash flows must offset each other in the range of 80 per cent to 125 per cent.

Hedge ineffectiveness is recognised in the consolidated income statement in 'Net gain on dealing in derivatives'.

Derivatives that do not qualify for hedge accounting

All gains and losses from changes in the fair values of derivatives that do not qualify for hedge accounting are recognised immediately in the consolidated income statement in net gain on dealing in derivatives.

4.6 Investments in associates

An associate is an entity over which the Bank has significant influence and that is neither a subsidiary nor an interest in a joint venture. Significant influence is the power to participate in the financial and operating policy decisions of the investee but is not control or joint control over those policies.

The results and assets and liabilities of associates are incorporated in these financial statements using the equity method of accounting, except when the investment is classified as held for sale, in which case it is accounted for in accordance with IFRS 5 Non-current Assets Held for Sale and Discontinued Operations. Under the equity method, investments in associates are carried in the consolidated statement of financial position at cost as adjusted for post-acquisition changes in the Bank's share of the net assets of the associate, less any impairment in the value of individual investments and share of changes in the statement of changes in equity. Losses of an associate in excess of the Bank's interest in that associate (which includes any long-term interests that, in substance, form part of the Bank's net investment in the associate) are recognised only to the extent that the Bank has incurred legal or constructive obligations or made payments on behalf of the associate.

Any excess of the cost of acquisition over the Bank's share of the net fair value of the identifiable assets, liabilities and contingent liabilities of the associate recognised at the date of acquisition is recognised as goodwill. The goodwill is included within the carrying amount of the investment and is assessed for impairment, at least annually, as part of that investment. Any excess of the Bank's share of the net fair value of the identifiable assets, liabilities and contingent liabilities over the cost of acquisition, after reassessment, is recognised immediately in profit or loss.

4 Significant accounting policies (continued)

4.6 Investments in associates (continued)

Where a Bank's subsidiary or other associate transacts with an associate of the Bank, profits and losses are eliminated to the extent of the Bank's interest in the relevant associate.

4.7 Impairment of non-financial assets

At each consolidated statement of financial position date, the Bank reviews the carrying amounts of its non-financial assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the assets is estimated in order to determine the extent of the impairment loss (if any). Where it is not possible to estimate the recoverable amount of an individual asset, the Bank estimates the recoverable amount of the cashgenerating unit to which the asset belongs.

Recoverable amount is the higher of fair value less costs to sell and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset.

If the recoverable amount of an asset (or cash-generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (cash-generating unit) is reduced to its recoverable amount. An impairment loss is recognised in the consolidated income statement, unless the relevant asset is carried at a revalued amount, in which case the impairment loss is treated as a revaluation decrease.

Where an impairment loss subsequently reverses, the carrying amount of the asset (cash-generating unit) is increased to the revised estimate of its recoverable amount, such that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset (cash-generating unit) in prior years. A reversal of an impairment loss is recognised in the consolidated income statement, unless the relevant asset is carried at a revalued amount, in which case the reversal of the impairment loss is treated as a revaluation increase.

4.8 Investment properties

Investment property is property held either to earn rental income or for capital appreciation or both, but not for sale in the ordinary course of business, use in the production or supply of goods or services or for administrative purposes. Investment property is reflected at valuation based on fair value at the statement of financial position date. The fair values are the estimated amounts for which a property could be exchanged on the date of valuation between a willing buyer and a willing seller in an arm's length transaction. The fair value is determined on periodic basis by independent professional valuers. Fair value adjustments on investment property are included in the consolidated income statement in the period in which these gains or losses arise.

4 Significant accounting policies (continued)

4.9 Property and equipment

Property and equipment are stated at historical cost less accumulated depreciation and impairment loss, if any. Historical cost includes expenditure that is directly attributable to the acquisition of the asset.

Depreciation is charged to income statement so as to write off the depreciable amount of property and equipment over their estimated useful lives using the straight-line method. The depreciable amount is the cost of an asset less its residual value. Land is not depreciated. Estimated useful lives are as follows:

Freehold properties	15 to 25 years
Leasehold properties	5 to 10 years
Furniture, equipment and vehicles	3 to 5 years
Computer equipment and accessories (including computer software)	3 to 10 years

Gain or loss arising on the disposal or retirement of an asset is determined as the difference between the sales proceeds and the carrying amount of the asset at that date and is recognised in the consolidated income statement.

4.10 Capital work in progress

Capital work in progress is stated at cost. When the asset is ready for use, capital work in progress is transferred to the appropriate property and equipment category and depreciated in accordance with the Bank's policies.

4.11 Borrowing costs

Borrowing costs directly attributable to the acquisition or construction of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use are added to the cost of those assets, until such time as the assets are substantially ready for their intended use.

All other borrowing costs are recognised in the consolidated income statement in the period in which they are incurred.

4.12 Other financial liabilities

Other financial liabilities, including borrowings, are initially measured at fair value, net of transaction costs.

Other financial liabilities are subsequently measured at amortised cost using the effective interest method, with interest expense recognised on an effective yield basis.

The effective interest method is a method of calculating the amortised cost of a financial liability and of allocating interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments through the expected life of the financial liability, or, where appropriate, a shorter period.

4 Significant accounting policies (continued)

4.13 Customers' deposits and short and medium term borrowings

Customers' deposits and short and medium term borrowings are initially measured at fair value which is normally consideration received, net of directly attributable transaction costs incurred, and subsequently measured at their amortised cost using the effective interest method.

Wakala deposits

The Principal (the customers) appoints the agent (the Bank) to invest its funds in Shari'ah compliant Investments. The Principal's funds will form part of the agent's treasury pool of funds that are invested by the agent in compliance with the rules and principles of Islamic Shari'ah as defined by the Fatwa and Shari'ah Supervisory Board of the agent. The agent will declare the profit rate to the customer in advance. The agent is obliged to guarantee the invested amount in case of default, negligence or violation of any of the terms and conditions of the Wakala.

4.14 Mandatory convertible securities

The component parts of mandatory convertible securities issued by the Bank are classified separately as equity and financial liability in accordance with the substance of the contractual arrangement. At the date of issue, the fair value of the liability component is estimated using the prevailing market interest rate for a similar non-convertible instrument. This amount is recorded as a liability on an amortised cost basis using the effective interest method until extinguished upon conversion or at the instrument's maturity date. The equity component is determined by deducting the amount of the liability component from the fair value of the convertible securities as a whole. This is recognised and included as a separate component in the consolidated statement of changes in equity, and is not subsequently re-measured.

4.15 Equity instruments

Debt and equity instruments are classified as either financial liability or equity in accordance with the substance of the contractual arrangement

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued by the Bank are recognised at the proceeds received, net of direct issue costs.

A financial instrument is classified as equity instrument if, and only if, both conditions (a) and (b) below are met.

- (a) The instrument includes no contractual obligation:
 - (i) to deliver cash or another financial asset to another entity; or
 - (ii) to exchange financial assets or financial liabilities with another entity under conditions that are potentially unfavourable to the Bank.
- (b) If the instrument will or may be settled in the Bank's own equity instruments, it is:
 - (i) a non-derivative that includes no contractual obligation for the Bank to deliver a variable number of its own equity instruments; or
 - (ii) a derivative that will be settled only by the Bank exchanging a fixed amount of cash or another financial asset for a fixed number of its own equity instruments

4 Significant accounting policies (continued)

4.16 Employees' end of service benefits

The Bank provides end of service benefits for its expatriate employees. The entitlement to these benefits is based upon the employees' length of service and completion of a minimum service period. The expected costs of these benefits are accrued over the period of employment.

Pension and national insurance contributions for the U.A.E. and GCC citizens are made by the Bank in accordance with Federal Law No. 7 of 1999.

4.17 Provisions and contingent liabilities

Provisions are recognised when the Bank has a present legal or constructive obligation as a result of past events and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate of the amount of the obligation can be made. Where a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows.

Provisions for onerous contracts is recognised when the expected benefits to be derived by the Bank from a contract are lower than the unavoidable cost of meeting its obligation under the contract. The provision is measured at the present value of the lower of the expected cost of terminating the contract and the expected net cost of continuing with the contract. Before a provision is established, the Bank recognizes any impairment loss on the assets associated with that contract.

When some or all of the economic benefits required to settle a provision are expected to be recovered from a third party, a receivable is recognised as an asset if it is virtually certain that reimbursement will be received and the amount of the receivable can be measured reliably.

Contingent liabilities, which include certain guarantees and letters of credit pledged as collateral security, are possible obligations that arise from past events whose existence will be confirmed only by the occurrence, or non-occurrence, of one or more uncertain future events not wholly within the Bank's control; or are present obligations that have arisen from past events but are not recognised because it is not probable that settlement will require outflow of economic benefits, or because the amount of the obligations cannot be reliably measured. Contingent liabilities are not recognised in the consolidated financial statements but are disclosed in the notes to the consolidated financial statements, unless they are remote.

4 Significant accounting policies (continued)

4.18 Sale and repurchase agreements

Securities sold subject to a commitment to repurchase them at a predetermined price at a specified future date (repos), are continued to be recognised in the consolidated statement of financial position and a liability is recorded in respect of the consideration received under short and medium term borrowings. The difference between sale and repurchase price is treated as interest expense using the effective interest rate yield method over the life of the agreement. Assets purchased with a corresponding commitment to resell at a specified future date (reverse repos) are not recognised in the consolidated statement of financial position. Amounts paid under these agreements are included in 'Loans and advances to banks' or 'Loans and advances to customers' as appropriate. The difference between purchase and resale price is treated as interest income using the effective yield method over the life of the agreement.

Securities borrowing and lending transactions are usually secured by cash or securities advanced by the borrower. Borrowed securities are not recognised on the statement of financial position or lent securities derecognised. Cash collateral received or given is treated as a loan or deposit; collateral in the form of deposit is not recognised. However, where securities borrowed are transferred to third parties, a liability for the obligation to return the securities to the stock lending counterparty is recorded.

4.19 Acceptances

Acceptances have been considered within the scope of IAS 39 (Financial Instruments: Recognition and Measurement) and are recognised as financial liability in the consolidated statement of financial position with a contractual right of reimbursement from the customer as a financial asset. Therefore, commitments in respect of acceptances have been accounted for as financial assets and financial liabilities.

4.20 Financial guarantees

Financial guarantees are contracts that require the Bank to make specified payments to reimburse the holder for a loss it incurs because a specified party fails to meet its obligation when due in accordance with the contractual terms.

Financial guarantee contracts are initially recognised at their fair value, which is likely to equal the premium received on issuance. The received premium is amortised over the life of the financial guarantee. The guarantee liability (the notional amount) is subsequently recognised at the higher of this amortised amount and the present value of any expected payments (when a payment under guarantee has become probable). The premium received on these financial guarantees is included within other liabilities.

4 Significant accounting policies (continued)

4.21 Recognition and de-recognition of financial instruments

The Bank initially recognises loans and advances, deposits, debt securities issued and subordinated liabilities on the date at which they are originated. Regular way purchases and sales of financial assets are recognised on the settlement date. All other financial assets and liabilities (including assets and liabilities designated at fair value through profit or loss) are initially recognised on the trade date at which the Bank becomes a party to the contractual provisions of the instrument.

A financial asset or financial liability is initially measured at fair value plus (for an item not subsequently measured at fair value through profit or loss) transaction costs that are directly attributable to its acquisition or issue.

The Bank derecognises a financial asset when the contractual rights to the cash flows from the financial asset expire, or when it transfers the rights to receive the contractual cash flows on the financial asset in a transaction in which substantially all the risks and rewards of ownership of the financial asset are transferred. Any interest in transferred financial assets that is created or retained by the Bank is recognised as a separate asset or liability.

The Bank derecognises a financial liability when its contractual obligations are discharged or cancelled or expire.

The Bank enters into transactions whereby it transfers assets recognised on its statement of financial position, but retains either all or substantially all of the risks and rewards of the transferred assets or a portion of them. If all or substantially all risks and rewards are retained, then the transferred assets are not derecognised from the consolidated statement of financial position. Transfers of assets with retention of all or substantially all risks and rewards include, for example, securities lending and repurchase transactions.

When assets are sold to a third party with a concurrent total return swap on the transferred assets, the transaction is accounted for as a secured financing transaction similar to repurchase transactions.

In transactions in which the Bank neither retains nor transfers substantially all the risks and rewards of ownership of a financial asset, it derecognises the asset if it does not retain control over the asset. The rights and obligations retained in the transfer are recognised separately as assets and liabilities as appropriate. The transfers in which control over the asset is retained, the Bank continues to recognise the asset to the extent of its continuing involvement, determined by the extent to which it is exposed to changes in the value of the transferred asset.

In certain transactions the Bank retains the obligation to service the transferred financial asset for a fee. The transferred asset is derecognized in its entirety if it meets the derecognition criteria. An asset or liability is recognised for the servicing contract, depending on whether the servicing fee is more than adequate (asset) or is less than adequate (liability) for performing the servicing.

The Bank writes off certain loans and investment securities when they are determined to be uncollectible (Note 9).

4 Significant accounting policies (continued)

4.22 Trade and settlement date accounting

The "regular way" purchases and sales of financial assets are recognised on the settlement date basis i.e. the date that the Bank physically receives or transfers the assets. Regular way purchases or sales are those that require delivery of assets within the time frame generally established by regulation or convention in the market place. Any significant change in the fair value of assets which the Bank has committed to purchase at the consolidated statement of financial position date is recognised in the consolidated income statement for assets classified as held for trading and in other comprehensive income for assets classified as available for sale.

4.23 Cash and cash equivalents

Cash and cash equivalents include cash on hand, unrestricted balances held with Central Banks, deposits and balances due from banks, due to banks, items in the course of collection from or in transmission to other banks and highly liquid assets with maturities of less than three months from the date of acquisition, which are subject to insignificant risk of changes in their fair value, and are used by the Bank in the management of its short-term commitments. Cash and cash equivalents are carried at amortised cost in the statement of financial position.

4.24 Employees' incentive plan shares

The Bank grants equity-settled share-based payments to employees. These grants will be settled in Abu Dhabi Commercial Bank P.J.S.C.'s shares and are measured at the fair value of the equity instruments at the grant date.

The fair value determined at the grant date of the equity-settled share-based payments is expensed on a straight-line basis over the vesting period, based on the Bank's estimate of equity instruments that will eventually vest. At the end of each reporting period, the Bank revises its estimate of the number of equity instruments expected to vest. The impact of the revision of the original estimates, if any, is recognised in the consolidated income statement over the remaining vesting period, with a corresponding adjustment to the employees' incentive plan reserve.

4.25 Offsetting

Financial assets and liabilities are offset and reported net in the consolidated statement of financial position only when there is a legally enforceable right to set off the recognised amounts and when the Bank intends to settle either on a net basis, or to realise the asset and settle the liability simultaneously.

Income and expenses are presented on a net basis only when permitted by the accounting standards, or for gains and losses arising from a group of similar transactions such as in the Bank's trading activity.

The Bank is party to a number of arrangements, including master netting agreements, that give it the right to offset financial assets and financial liabilities but where it does not intend to settle the amounts net or simultaneously and therefore the assets and liabilities concerned are presented on gross basis.

4 Significant accounting policies (continued)

4.26 Fiduciary activities

The Bank acts as trustees/manager and in other capacities that result in holding or placing of assets on behalf of trusts or other institutions. These assets and income arising thereon are not included in the Bank's consolidated financial statements as they are not assets of the Bank.

4.27 Segment reporting

A segment is a distinguishable component of the Bank that is engaged either in providing products or services (business segment), or in products or services within a particular economic environment (geographical segment), which is subject to risks and rewards that are different from those of other segments. Refer to Note 38 on Business Segment reporting.

4.28 Taxation

Provision is made for taxes at rates enacted or substantively enacted by the statement of financial position date on taxable profits of overseas branches and subsidiaries in accordance with the fiscal regulations of the countries in which the Bank operates. Deferred taxation is accounted for in full for all temporary differences between the carrying amount of an asset or liability for accounting purpose and its carrying amount for tax purposes. Deferred tax assets are only recognised to the extent that it is probable that they will be recovered. Income tax is recognised in the consolidated income statement except to the extent that it relates to items recognised directly in equity, in which case it is recognised in equity.

4.29 Revenue and expense recognition

Interest income and expense for all financial instruments except for those classified as held for trading or designated at fair value are recognised in 'interest income' and 'interest expense' in the consolidated income statement using the effective interest method. The effective interest method is a way of calculating the amortised cost of a financial asset or a financial liability (or groups of financial assets or financial liabilities) and of allocating the interest income or interest expense over the expected life of the asset or liability.

The effective interest rate is the rate that exactly discounts estimated future cash receipts or payments through the expected life of the financial instrument or, where appropriate, a shorter period, to the net carrying amount of the financial asset or financial liability. When calculating the effective interest rate, the Bank estimates cash flows considering all contractual terms of the financial instrument but not future credit losses. The calculation includes all amounts paid or received by the Bank that are an integral part of the effective interest rate of a financial instrument, including transaction costs and all other premiums or discounts.

Interest accruing on loans and advances considered doubtful is excluded from income until received. Subsequently the interest income on impaired financial assets is recognised using the rate of interest used to discount the future cash flows for the purpose of measuring the impairment loss.

4 Significant accounting policies (continued)

4.29 Revenue and expense recognition (continued)

Fee income is earned from a diverse range of services provided by the Bank to its customers. Fee income is accounted for as follows:

- income earned on the execution of a significant act is recognised as revenue when the act is completed (for example, fees arising from negotiating, or participating in the negotiation of, a transaction for a third-party, such as the arrangement for the acquisition of shares or other securities);
- income earned from the provision of services is recognised as revenue as the services are provided (for example, asset management, portfolio and other management advisory and service fees); and
- income which forms an integral part of the effective interest rate of a financial instrument is recognised as adjustment to the effective interest rate (for example, certain loan commitment fees) and recorded in 'interest income'.

Gain or loss on trading and investment securities comprises all unrealized gains and losses from changes in the fair value of held for trading securities and realized gains or losses on disposal of investment securities. Gain or loss on disposal of held to maturity investments represents the difference between the sale proceeds and the carrying value of such investments on the date of sale less any associated selling costs. Gain or loss on disposal of available for sale investments represents the difference between sale proceeds and their original cost net of impairment if any, less associated selling costs.

Dividend income is recognised when the right to receive payment is established.

Murabaha financing

Profit from sales transactions (murabaha) is recognised when the ultimate income is both contractually determinable and quantifiable at the commencement of the transaction. Such income is recognised by proportionately allocating the attributable profits over the period of the credit whereby each financial period shall carry its portion of profits irrespective of whether or not cash is recovered. Income related to non-performing is excluded from the statement of income.

Ijara financing

Ijara income is recognised proportionately to the financial periods over the lease term. Ijara financing is an agreement whereby the Bank (lessor) leases an asset to a customer (lessee), for a specific period against certain rent installments. Ijara could end in transferring the ownership of the asset to the lessee at the end of the lease period. Also, the Bank transfers substantially all the risks and returns related to the ownership of the leased asset to the lessee

Salam Financing

Revenue in salam financing is recognized upon delivery of goods. Salam financing is recognized as an asset when the cash, kind or benefit is paid in advance to the seller for the delivery of the commodity in future

4 Significant accounting policies (continued)

4.30 Foreign currencies

Items included in the financial statements of each of the Bank's entities are measured using the currency of the primary economic environment in which the entity operates (the 'functional currency'). The consolidated financial statements of the Bank are presented in AED, which is the Bank's presentation currency.

Transactions in foreign currencies are recorded in the functional currency at the rate of exchange prevailing on the date of the transaction. Monetary assets and liabilities denominated in foreign currencies are translated into the functional currency at the rate of exchange prevailing at the statement of financial position date. Any resulting exchange differences are included in the income statement. Non-monetary assets and liabilities that are measured at historical cost in a foreign currency are translated into the functional currency using rate of exchange at the date of initial transaction. Non-monetary assets and liabilities measured at fair value in a foreign currency are translated into the functional currency using the rate of exchange at the date the fair value was determined. Any exchange component of a gain or loss on a non-monetary item is recognised directly in equity. Any exchange component of a gain or loss on the non-monetary is recognised directly in the consolidated income statement if the gain or loss on the non-monetary item is recognised in the income statement.

In the consolidated financial statements, the assets, including related goodwill where applicable, and liabilities of branches, subsidiaries, joint ventures and associates whose functional currency is not AED, are translated into the Bank's presentation currency at the rate of exchange ruling at the statement of financial position date. The results of branches, subsidiaries, joint ventures and associates whose functional currency is not AED are translated into AED at the average rates of exchange for the reporting period. Exchange differences arising from the retranslation of opening foreign currency net investments, and exchange differences arising from retranslation of the result for the reporting period from the average rate to the exchange rate prevailing at the period end, are recognised in other comprehensive income and accumulated in equity in the 'foreign exchange reserve'.

On disposal or partial disposal (i.e. of associates or jointly controlled entities not involving a change of accounting basis) of a foreign operation, exchange differences relating thereto and previously recognised in reserves are recognised in the consolidated income statement on proportionate basis except in the case of partial disposal (i.e. no loss of control) of a subsidiary that includes a foreign operation, the proportionate share of accumulated exchange differences are re-attributed to non-controlling interests and are not recognised in consolidated income statement.

Goodwill and fair value adjustments arising on the acquisition of a foreign operation are treated as assets and liabilities of the foreign operation and translated at the closing rate.

5 Critical accounting judgements and key sources of estimation of uncertainty

The reported results of the Bank are sensitive to the accounting policies, assumptions and estimates that underlie the preparation of these consolidated financial statements. IFRS require the management, in preparing the Bank's consolidated financial statements, to select suitable accounting policies, apply them consistently and make judgements and estimates that are reasonable and prudent. In the absence of an applicable standard or interpretation, IAS 8 'Accounting Policies, Changes in Accounting Estimates and Errors', requires management to develop and apply an accounting policy that results in relevant and reliable information in the light of the requirements and guidance in IFRS dealing with similar and related issues and the IASB's Framework for the Preparation and Presentation of Financial Statements. The judgements and assumptions involved in the Bank's accounting policies that are considered by the Board of Directors to be the most important to the portrayal of its financial condition are discussed below. The use of estimates, assumptions or models that differ from those adopted by the Bank would affect its reported results.

5.1 Loans and advances

The impairment allowance for loan losses is established through charges to the consolidated income statement in the form of an impairment allowance for doubtful loans and advances.

5.1.1 Individually assessed loans

Impairment losses for individually assessed loans are determined by an evaluation of exposure on a caseby-case basis. This procedure is applied to all classified corporate and commercial loans and advances which are individually significant accounts or are not subject to the portfolio-based-approach.

The following factors are considered by management when determining allowance for impairment on individual loans and advances which are significant:

- The amount expected to be realised on disposals of collaterals.
- The Bank's ability to enforce its claim on the collaterals and associated cost of litigation.
- The expected time frame to complete legal formalities and disposals of collaterals.

The Bank's policy requires regular review of the level of impairment allowances on individual facilities and regular valuation of the collateral and its enforceability.

Impaired loans continue to be classified as impaired unless they are fully current and the collection of scheduled interest and principal is considered probable.

5 Critical accounting judgements and key sources of estimation of uncertainty (continued)

5.1 Loans and advances (continued)

5.1.2 Collectively assessed loans

Collective assessment of allowance for impairment is made for overdue retail loans with common features which are not individually significant and performing loans which are not found to be individually impaired.

The following factors are considered by management when determining allowance for impairment for such loans:

Retail loans – All the loans falling under similar overdue category are assumed to carry similar credit risk and allowance for impairment is taken on a gross basis.

Other performing loans – The management of the Bank assesses, based on historical experience and the prevailing economic and credit conditions, the magnitude of loans which may be impaired but not identified as of the consolidated statement of financial position date.

5.2 Fair value of unquoted financial instruments

The fair values of financial instruments that are not quoted in active markets are determined by using valuation techniques. Where valuation techniques (for example, models) are used to determine fair values, they are validated and periodically reviewed by qualified personnel independent of the area that created them. All models are certified before they are used, and models are calibrated to ensure that outputs reflect actual data and comparative market prices. To the extent, practical models use only observable data, however; areas such as credit risk (both own and counterparty), volatilities and correlations require management to make estimates. Changes in assumptions about these factors could affect the reported fair value of financial instruments.

5.3 Impairment of available for sale investments

The Bank exercises judgment to consider impairment on the available for sale investments. This includes determination of a significant or prolonged decline in the fair value below its cost. In making this judgment, the Bank evaluates among other factors, the normal volatility in market price. In addition, the Bank considers impairment to be appropriate when there is evidence of deterioration in the financial health of the investee, industry and sector performance or changes in technology.

5 Critical accounting judgements and key sources of estimation of uncertainty (continued)

5.4 Impairment of investments in associates

After application of equity method of accounting, the Bank determines whether it is necessary to recognise for any additional impairment loss on the carrying value of the investment in associate by comparing its recoverable amount with the higher of value in use or fair value less costs to sell with its carrying amount.

In determining the value in use of the investment, the Bank estimates:

- i) its share of the present value of the estimated future cash flows expected to be generated by the associates, including the cash flows from the operations of the associates and the proceeds on the ultimate disposal of the investment; or
- ii) the present value of the estimated future cash flows expected to arise from dividends to be received from the investment and from its ultimate disposal.

5.5 Derivative financial instruments

Subsequent to initial recognition, the fair values of derivative financial instruments measured at fair value are generally obtained by reference to quoted market prices, discounted cash flow models and recognised pricing models as appropriate. When independent prices are not available, fair values are determined by using valuation techniques which refer to observable market data. These include comparison with similar instruments where market observable prices exist, discounted cash flow analysis, option pricing models and other valuation techniques commonly used by market participants. The main factors which management considers when applying a model are:

- a) The likelihood and expected timing of future cash flows on the instrument. These cash flows are usually governed by the terms of the instrument, although management judgement may be required in situations where the ability of the counterparty to service the instrument in accordance with the contractual terms is in doubt.
- b) An appropriate discount rate for the instrument. Management determines this rate, based on its assessment of the appropriate spread of the rate for the instrument over the risk-free rate. When valuing instruments by reference to comparable instruments, management takes into account the maturity, structure and rating of the instrument with which the position held is being compared. When valuing instruments on a model basis using the fair value of underlying components, management considers, in addition, the need for adjustments to take account of a number of factors such as bid-offer spread, credit profile, servicing costs of portfolios and model uncertainty.

9 Loans and advances, net (continued)

The Bank's risk classification of loans and advances which is in adherence with the recommendations of Central Bank of United Arab Emirates and Basel II guidelines is as follows:

Risk Category

Performing loans

Overdue but not impaired loans

Non performing loans

Upto 30 days past due

Between 31 and 90 days past due

Over 91 days past due

The risk classification of loans and advances are as follows:

	2009 AED'000	2008 AED'000
Performing loans	110,352,702	104,615,487
Over due but not impaired loans	4,248,171	5,195,330
Non performing loans	6,241,676	1,260,283
Less: Allowance for impairment	120,842,549 (4,232,257)	111,071,100 (1,990,011)
Less. Anowance for impairment	116,610,292	109,081,089
		

Loans and advances include an interest free loan to the Government of Abu Dhabi ("Government") of AED 495,150 thousand (2008 – AED 545,400 thousand). This loan arose as a result of the Government acquiring certain non-performing loans in previous years and were indemnified by the Government through a guarantee. The Bank has an equal amount of long term deposit against the interest free loan to Government (Note 17).

Collaterals

The Bank holds collaterals against loans and advances in the form of mortgage interests over properties, vehicles and machineries, cash margins, fixed deposits, guarantees and others. The Bank accepts guarantees mainly from well reputed local or international banks, well established local or multinational corporates and high net-worth private individuals. The Bank carries all collaterals at cost except for listed securities, which are being fair valued through a separate share lending system. The carrying value of these collaterals at December 31, 2009 approximates to AED 102,336,086 thousand (2008 - AED 77,922,451 thousand).

During the year, the Bank has started fair valuation exercise whereby around fifty percent of its mortgage collaterals were fair valued through external evaluators to assess and estimate that the fair value approximates carrying value.

9 Loans and advances, net (continued)

Movement of the individual and collective impairment allowance on loans and advances is as follows:

		2009			2008	
	Individual	Collective		Individual	Collective	
	impairment	impairment	Total	Impairment	impairment	Total
	AED'000	AED'000	AED'000	AED'000	AED'000	AED'000

10 Derivative financial instruments

In the ordinary course of business the Bank enters into various types of derivative transactions that are effected by variables in the underlying instruments and subject to changes in the underlying instruments. A derivative financial instrument is a financial contract between two parties where payments are dependent upon movements in the price of one or more underlying financial instrument, reference rate or index. Derivative financial instruments, which the Bank enters into includes forwards, options, futures and swaps.

The Bank uses the following derivative financial instruments for both hedging and non-hedging purposes.

Forward transactions

Currency forwards represent commitments to purchase foreign and domestic currencies, including non-deliverable spot transactions. Foreign currency and interest rate futures are contractual obligations to receive or pay a net amount based on changes in currency rates or interest rates, or to buy or sell foreign currency or a financial instrument on a future date at a specified price, established in an organised financial market. The credit risk is negligible, as futures contracts are collateralised by cash or marketable securities, and changes in the futures' contract value are settled daily with the exchange. Forward rate agreements are individually negotiated interest rate futures that call for a cash settlement at a future date for the difference between a contracted rate of interest and the current market rate, based on a notional principal amount.

Swap transactions

Currency and interest rate swaps are commitments to exchange one set of cash flows for another. Swaps result in an economic exchange of currencies or interest rates (for example, fixed rate for floating rate) or a combination of all these (i.e., cross-currency interest rate swaps). No exchange of principal takes place, except for certain cross currency swaps. The Bank's credit risk represents the potential loss if counterparties fail to fulfill their obligation. This risk is monitored on an ongoing basis with reference to the current fair value, a proportion of the notional amount of the contracts and the liquidity of the market. To control the level of credit risk taken, the Bank assesses counterparties using the same techniques as for its lending activities.

Option transactions

Foreign currency and Interest rate options are contractual agreements under which the seller (writer) grants the purchaser (holder) the right, but not the obligation, either to buy (a call option) or sell (a put option) at or by a set date or during a set period, a specific amount of a foreign currency or a financial instrument at a predetermined price. The seller receives a premium from the purchaser in consideration for the assumption of foreign exchange or interest rate risk. Options may be either exchange-traded or negotiated between the Bank and a customer over the counter (OTC).

10 Derivative financial instruments (continued)

The fair values of derivative financial instruments held are set out below.

	<u>Fair values</u> Assets Liabili	
	AED'000	AED'000

Derivatives held for hedging	414,927	540,193
	6,617,613	6,778,893

The derivatives held for hedging consist of interest rate swaps, cross currency swaps and foreign exchange forward contracts.

10 Derivative financial instruments (continued)

Derivative related credit risk

Credit risk in respect of derivative financial instruments arises from the potential for a counterparty to default on its contractual obligations and is limited to the positive fair value of instruments that are favourable to the Bank. The Bank enters into derivative contracts with financial institutions and corporates which are of good credit rating.

Derivatives held or issued for trading purposes

The Bank's trading activities are predominantly related to offering hedging solutions to customers at competitive prices in order to enable them to transfer, modify or reduce current and expected risks. The Bank also manages risk taken as a result of client transactions or initiate positions with the expectation of profiting from favourable movement in prices, rates or indices.

Derivatives held or issued for hedging purposes

The Bank uses derivative financial instruments for hedging purposes as part of its asset and liability management activities in order to reduce its own exposure to fluctuations in exchange and interest rates. The Bank uses forward foreign exchange contracts, cross currency swaps and interest rate swaps to hedge exchange rate and interest rate risks. In all such cases the hedging relationship and objectives, including details of the hedged item and hedging instrument, are formally documented and the transactions are accounted for based on type of the hedge.

During 2008 the Bank reclassified financial asset from the held-for-trading category into the available-for-sale category. This reclassification is made in accordance with paragraph 50B of IAS 39 as amended. The turbulence in the financial markets during the second half of 2008 was regarded by management as rare circumstances in the context of paragraph 50B of IAS 39 as amended. This financial asset represents investment in fund that provides the Bank with an opportunity of return through dividend incomes and trading gains. It does not have fixed maturity or coupon rate. The fair value is determined by the Fund's managers based on the net asset value. The fair value of the reclassified financial assets, at the date of reclassification, was AED 116,325 thousand and at June 30, 2009 was AED 34,099 thousand. The fair value loss on this financial asset at June 30, 2009 amounting to AED 82,283 thousand (December 31, 2008 – AED 88,992 thousand) was recognized under cumulative changes in fair values in the consolidated statement of comprehensive income. With effect from June 30, 2009, the Bank increased its interest and gained significant influence on this financial asset and the financial asset was transferred from investment available-for-sale to investment in associates (Note 12). The cumulative fair value loss on this financial asset from initial reclassification date has been reclassified from other comprehensive income to the consolidated income statement.

With effect from June 30, 2009, the Bank increased its interest and gained significant influence on ADCB MSCI U.A.E. Index Fund. The Fund was transferred from investment available-for-sale to investment in associates (Note 12). The cumulative fair value loss on the fund amounting to AED 4,649 thousand has been reclassified from other comprehensive income to the consolidated income statement.

During the year, the Bank gained control in ADCB MSCI Arabian Markets Index Fund through increase in stake in the unit capital of the fund. On the date of acquisition of the controlling interest the fair value of investment in the fund was AED 79,557 thousand with cumulative loss recognised in other comprehensive income amounting to AED 57,173 thousand. As a result of the acquisition of the controlling interest, the cumulative fair value loss amounting to AED 57,173 thousand has been reclassified from other comprehensive income to income statement. The Bank's effective holding in the fund as at December 31, 2009 is 96% (Note 48).

The investment securities include Structured Finance Assets, such as Collateralized Debt Obligations (CDOs), and Cash flow CDOs, which are dependent on the performance of collateral located outside U.A.E., primarily investment grade corporate credit assets in the U.S.A., Western Europe and Asia.

11 Investment securities (continued)

The nominal value and fair value of these securities at December 31, 2009 amounted to AED 933,249 thousand and AED 414,338 thousand respectively (2008 - AED 1,243,259 thousand and AED 510,738 thousand respectively). These securities have been negatively impacted by the global financial crisis and subsequent recession that stemmed from the U.S.A. subprime situation, corporate credit events and corporate insolvencies in both the U.S.A. and Europe, as well as ongoing liquidity shortages. The continued uncertainty in long-term outlook for the global economy and increased volatility in credit default spreads also continues to negatively impact fair values. The above exposure is net of collective impairment allowance amounting to AED 404,663 (2008 - AED 400,300 thousand) against the total above exposure.

The impairment allowances have been estimated by the Banks' management based on the present market and the expected economic conditions of the underlying investments.

The Bank originally appointed two independent advisors of international repute to act as asset managers and advisors to the portfolio of structured investments. During 2009, the Bank consolidated the advisory mandate with one of them.

The investment advisor advises on restructuring as well on potential divestments and provides the assessments of the realizable economic value of these securities.

The investment advisor uses a combination of quantitative and qualitative approaches to assess the economic value and potential expected losses, if any, on investment securities. Evaluation models use several scenario runs with varying assumptions on price volatility and varying magnitudes of economic downturns. Models also vary collateral assumptions based on shifting risk elements to assess the potential severity of loss on the underlying portfolio. Loss breakpoints for particular tranches of risk represented by individual investments are also assessed under different scenarios.

The specification of models, the valuation fields and inputs used in assessments of economic value are adjusted for market dynamics according to the underlying asset class and nature of the collateral supporting the investments. Parameters for loan-backed transactions including material movements in loan prices on a weekly basis greater than a specified amount or a specified percent are captured to recalibrate values, such as a loan that has gone below the 25th percentile within all the loan prices across its industry. In addition, parameter measures specific for CDO structures include proximity to coverage tests, assessments for underlying collateral that either a particular position has (i) increased the percentage of loans in stress (60 +/- day delinquencies, foreclosure, credit default swaps movements) by a specified amount or (ii) reached a threshold level of stress. Additional quantitative analysis include cash flow modeling, predicting the probability of any diversion test (over-collateralization or interest-coverage) being breached.

Other qualitative measures include the potential implications of rating changes, such as forced triggers, on the investments, as well as rating changes on assets in the underlying portfolio.

The maximum exposure to credit risk on investment securities is limited to the carrying value of these investments. The Bank monitors the credit ratings of the counterparties with whom the investments are placed on a regular basis.

12 Investments in associates

Name of associate	2009 AED'000	2008 AED'000
RHB Capital Berhad Abu Dhabi Finance P.J.S.C. Al Nokhitha Fund ADCB MSCI U.A.E. Index Fund	4,474,784 - 73,150 34,725	4,327,529 100,000 -

12 Investments in associates (continued)

(a) On May 14, 2008 the Bank acquired through its wholly owned subsidiary ADCB Holdings (Malaysia) Sdn Berhad a 25% equity stake in RHB Capital Berhad, Malaysia ("Associate").

The cost of acquisition over the Bank's share of the net fair value of the identifiable assets and liabilities of the associate recognised at the date of the acquisition amounting to AED 2,048,390 thousand was identified as goodwill and included in the carrying value of investment in associate. Management has assessed the total carrying value of investment in associate for impairment as detailed in Note 5.4 and determined that no impairment has occurred.

The Bank's share of profit of associate is adjusted for amortization of tangible and intangible assets identified during goodwill assessment and also appropriately adjusted for the differences arising on conversion from Malaysian Accounting Standards to IFRS.

The equity instruments of RHB Capital Berhad are quoted in Bursa Stock Exchange, Malaysia and the quoted value of the investment at December 31, 2009 amounted to AED 3,061,303 thousand (2008 – AED 2,233,736 thousand).

At December 31, 2009, the Bank partially hedged its currency translation risk in net investment in RHB Capital Berhad through foreign exchange forward contracts and designated these contracts as hedging derivatives. The hedging instruments resulted in losses of AED 107,360 thousand which have been recognised in other comprehensive income. No amounts are withdrawn from equity during the year as there was no disposal of net investment in associate.

- (b) In 2008, the Bank contributed to the extent of 20% of equity in Abu Dhabi Finance P.J.S.C., United Arab Emirates ("Associate"). The principal activities of the Associate is mortgage finance. During the period, the Bank disposed 4% of its investment in Abu Dhabi Finance P.J.S.C., reducing the Bank's equity stake to 16%. The transaction has not resulted in any gain or loss on disposal and accordingly, the investment has been transferred to available-for-sale investments at its carrying value.
- (c) With effect from June 2009, the Bank increased its ownership interest in Al Nokhita Fund and obtained significant influence over the fund. This investment in associate is held by a subsidiary of the Bank Al Nokhitha Feeder Fund.

12 Investments in associates (continued)

(d) With effect from June 2009, the Bank increased its ownership interest in ADCB MSCI U.A.E. Index Fund and obtained significant influence over the fund. This investment in associate is held by a subsidiary of the Bank – MSCI UAE Index Fund Feeder Fund.

The latest available financial information in respect of Bank's associates are summarised as follows:

	2009 AED'000	2008 AED'000
Total assets Total liabilities	117,660,417 108,334,766	111,212,413 102,870,437
Net assets	9,325,651	8,341,976
Total interest and other operating income	4,357,319	3,665,193
Total profit for the period	997,564	1,116,834
13 Investment properties	2009 AED'000	2008 AED'000
At January 1 Transfer in from property and equipment, net	632,492	445,730 8,614
(Decrease)/increase in fair value of investment properties	(83,000)	178,148
At December 31	549,492	632,492

The fair value of the Bank's investment properties has been arrived at on the basis of valuations carried out by independent valuers that are not related to the Bank. The fair value of investment properties is estimated periodically by considering recent prices for similar properties in the same location and similar conditions, with adjustments to reflect any changes in the nature, location or economic conditions since the date of the transactions that occurred at these prices. The effective date of the valuation is December 31, 2009. All the investment properties of the Bank are located within the U.A.E.

17 Customers' deposits (continued)

Islamic related product deposits include the following:

	2009	2008
	AED'000	AED'000
Product		
Mudaraba savings and deposits	4,899,358	158,697
Wakala deposits	757,972	1,937,984
Wadiah	1,608,717	18,381
	7,266,047	2,115,062

Profit distributed to Wakala deposit holders during the year amounted to AED 104,777 thousand (2008 – AED 27,865 thousand).

Profit distribution for Investment Account Holders

Profit distribution is made between deposit and saving account holders and shareholders according to the instructions of Fatwa and Shari'ah supervisory board:

Net income of all items of Mudaraba Pool at the end of each quarter, is the net profit distributable between the shareholders and depositors and saving account holders.

The share of unrestricted investment and saving account holders is calculated out from the net profit at the end of each quarter by adopting the separate investment account method after deducting the agreed upon and declared Mudaraba fee percentage.

18 Mandatory convertible securities

During 2008, the Bank issued mandatory convertible securities ("MCS") with nominal value amounting to AED 4,800,000 thousand that are convertible into new ordinary registered shares at the end of the third year from the date of issue. The U.A.E. Central Bank approved that the MCS can be considered for Tier 1 Capital adequacy regulation requirements and accordingly included in capital adequacy computation (Note 49). Interest is payable at EIBOR plus 1.5 per cent per annum on a quarterly basis, in arrears, up and until the conversion date.

The proceeds received from issue of MCS have been split between a liability component arising from interest payments and an equity component, representing the residual attributable to the future delivery of the equity of the Bank, as follows:

		AED'000
Proceeds of issue Issue costs		4,800,000 (21,635)
Net proceeds received Liability component on initial recognition		4,778,365 (144,482)
Equity component on initial recognition		4,633,883
	2009 AED'000	2008 AED'000
Liability component Interest expense for the year Interest paid during the year	168,435 153,296 (212,682)	144,482 168,106 (144,153)
	109,049	168,435

The interest charged for the year is calculated by applying an effective interest rate of 2.08% p.a. (2008 – 7.80%). The liability component is measured at amortised cost.

ABU DHABI COMMERCIAL BANK P.J.S.C.

US\$	Fixed rate of 5.25% p.a. & 3 months LIBOR plus 35 basis points	3 months LIBOR plus 30 to 110 basis points	Fixed rate of 4.75% p.a

Interest on the syndicated loans are payable in monthly coupons in arrears with 25 basis points to 27.5 basis points over 1 month LIBOR, quarterly coupons in arrears with 27.5 basis points to 185 basis points over 3 months LIBOR. The Bank has option to roll over the syndicated loan for a further period of two years from the date of maturity. Interest on the subordinated floating rate notes is payable quarterly in arrears at a coupon rate of 60 basis points over 3 month LIBOR.

The Bank also has an unsecured standby facility of US\$ 25,000 thousand (December 31, 2008 – US\$ 175,000 thousand) from a consortium of banks with a drawdown period of six months.

20 Long term borrowings

Instrument	Currency	2009 AED'000	2008 AED'000
Unsecured notes	Turkish Lira (TRY) U.A.E. Dirham (AED)	90,204 500,000	88,527 500,000

Fair value adjustment on long term borrowings being hedged		9,483	8,172
		8,619,494	2,139,359

Interest on unsecured notes are payable in arrears and the coupon rates as at December 31, 2009 are as follows:

Currency	<u>Over 5 years</u>
TRY	Fixed rate of 12.75% p.a.
AED	Fixed rate of 6% p.a.
US\$	Fixed rate of 5.3875% p.a.

Interest on the subordinated floating rate notes is payable quarterly in arrears at a coupon rate of 60 basis points over 3 months LIBOR. The subordinated floating rate notes were obtained from financial institutions outside the U.A.E. and qualify as Tier II subordinated loan capital for the first 5 year period till 2011 and thereafter it will be amortised at the rate of 20% per annum till 2016 for capital adequacy calculation (Note 49) if these are not redeemed during 2011. This has been approved by the Central Bank of the U.A.E..

Tier II loan

In 2008, the U.A.E. federal government provided liquidity support in the form of new government deposits to the U.A.E.'s major commercial banks, including ADCB. Late in 2008, the U.A.E. federal government made an offer to convert these deposits into Tier II qualifying loans. In March 2009, the Bank accepted this offer to convert approximately AED 6,617,456 thousand government deposits into Tier II qualifying loans. As per this offer, the Tier II qualifying loan will mature seven years from the date of the issue and will carry interest rate payable on a quarterly basis at a fixed rate of 4 percent per annum commencing March 31, 2009 for the first two years, 4.5 percent per annum for the third year, 5 percent per annum for the fourth year and 5.25 percent per annum for the remaining period. The terms also provide that ADCB will have a call option to repay the loans partially or fully at the end of five years from the date of issue. For regulatory purposes, the loan qualifies as Tier II capital.

21 Other liabilities

	2009 AED'000	2008 AED'000
Interest payable Employees' end of service and other benefits Accounts payable and other creditors Clearing payables Deferred income Acceptances Others	992,049 130,973 736,492 606 263,881 4,631,510 985,154	700,122 109,906 504,950 271,194 127,202 887,669 1,134,314

		<u> </u>	·	

During 2006, Abu Dhabi Investment Authority's holding of 64.841% of the Bank's issued and fully paid up share capital was transferred to Abu Dhabi Investment Council by Law No.16 of 2006. The shareholders of the Bank approved this share transfer at the extraordinary general assembly meeting of the Bank held on March 18, 2007.

Following the Annual General Meeting held on March 31, 2009, the Shareholders approved the distribution of proposed cash dividends of AED 481,000 thousand representing 10% of the paid up capital for the year 2008 (2007: cash dividends of AED 400,000 thousand and bonus shares of AED 810,000 thousand representing 10% and 20.25% of the paid up capital respectively).

23 Statutory and other reserves

Statutory reserve

As required by Article 82 of Union Law No 10 of 1980, 10% of the net profit for the year is transferred to the statutory reserve. The Bank may resolve to discontinue such annual transfers when the reserve equals 50% of the nominal value of the paid up share capital. The statutory reserve is not available for distribution.

Legal reserve

In accordance with the U.A.E. Federal Commercial Companies Law No. 8 of 1984 (as amended) and Article 84 of the Memorandum and Articles of Association of the Bank, 10% of the net profit for the year is transferred to the legal reserve. The Bank may resolve to discontinue such annual transfers when the reserve equals 50% of the nominal value of the paid up share capital. The legal reserve is not available for distribution.

General reserve

In accordance with Article 84 of the Memorandum and Articles of Association of the Bank, a further percentage of net profit for the year is transferred to the general reserve based on the recommendation of the Board of Directors. The Bank may resolve to discontinue such annual transfers when the reserve equals 25% of the nominal value of the paid up share capital. This reserve may only be used for the purposes recommended by the Board of Directors and approved by the shareholders.

Contingency reserve

The contingency reserve is established to cover unforeseen future risks or contingencies which may arise from general banking risks.

24 Employees' incentive plan shares, net

The Bank has established an Employee Long Term Incentive Plan (the "Plan") to recognise and retain good performing key management employees. Under the Plan, the employees will be granted shares of the Bank when they meet the vesting conditions. These shares were acquired from the stock market by the Bank at the prevailing market price on the acquisition dates. The fair value of the granted shares at the grant date was AED 38,131 thousand, which is recognised in the consolidated income statement on a straight line basis over a 3 years vesting period. These shares are held by ACB LTIP (IOM) Limited, a consolidated subsidiary, until vesting conditions are met. The Bank's Nomination/Remuneration and HR Committee has determined and approved the shares granted to key management employees based on the Bank's key performance indicators and with respect to the annual salary of each employee. Description of the Plan is as follows:

Date of the grant – January 1, 2008

Number of shares granted – 14,346,260

Vesting conditions – Three years' service from the grant date or meeting special conditions during the vesting period (death, disability, retirement or termination)

The movement of plan shares is as follows

	2009	2008
Shares outstanding at January 1 Shares granted during the year Exercised during the year	14,346,260 - (1,172,932)	14,346,260
Outstanding at December 31	13,173,328	14,346,260
Exercisable at December 31	-	
	2009	2008
Amount of "Plan" costs recognised in the statement of income	AED'000 12,270	AED'000 12,423

25 Proposed dividends

For the year ended December 31, 2009, the Board of Directors have proposed not to pay dividends on the paid up capital (2008: cash dividends of AED 481,000 thousand representing 10% of the paid up capital). This is subject to the approval of the shareholders in the Annual General Meeting.

26 Capital notes

In February 2009, as part of the Government's strategy to respond to the global financial crisis, the Department of Finance, Government of Abu Dhabi subscribed for ADCB's Tier I regulatory capital notes with a principal amount of AED 4 billion (the "Notes"), along with such capital notes from other major commercial banks in Abu Dhabi.

The Notes are non-voting, non-cumulative perpetual securities for which there is no fixed redemption date, and are callable by the Issuer subject to certain conditions. The Notes are direct, unsecured, subordinated obligations of the Bank and rank pari passu without any preference among themselves and the rights and claims of the Note holders will be subordinated to the claims of Senior Creditors. The Notes bear interest at the rate of 6% per annum payable semi-annually until February 2014, and a floating interest rate of 6 month EIBOR plus 2.3% per annum thereafter. However the Bank may at its sole discretion elect not to make a coupon payment. The Note holders do not have a right to claim the coupon and an election by the Bank not to service coupon is not considered an event of default. In addition, there are certain circumstances under which the Bank is prohibited from making a coupon payment on a relevant coupon payment date ("Non-Payment Event").

If the Bank makes a non-payment election or a non-payment event occurs, then the issuer will not (a) declare or pay any distribution or dividend or (b) redeem, purchase, cancel, reduce or otherwise acquire any of the share capital or any securities of the Issuer ranking pari passu with or junior to the Notes except securities, the term of which stipulate a mandatory redemption or conversion into equity, in each case unless or until two consecutive coupon payments have been paid in full.

33 Earnings per share

Basic

Basic earnings per share is calculated by dividing the net profit for the year attributable to the equity holders of the Bank by the weighted average number of shares outstanding during the year.

Ordinary shares that will be issued upon the conversion of Mandatory Convertible Securities (MCS) are included in the calculation of basic earnings per share.

	2009	2008
Net (loss)/profit for the year attributable to the equity holders of the Bank (AED'000)	(559,448)	1,236,592
Add: Interest on MCS for the year	153,296	168,106
Less: Coupons paid on capital notes (AED'000)	(120,000)	-
Net adjusted (loss)/profit for the year attributable to the equity		
holders of the Bank (AED'000) (a)	(526,152)	1,404,698
Weighted average number of shares in issue throughout the year (000's)	4,810,000	4,810,000
Add: Weighted average number of shares resulting from conversion of MCS (000's)	785,597	531,444
Less: Weighted average number of shares resulting from Employees' incentive share plan (000's)	(13,564)	(1,018)
Weighted average number of potential equity shares in issue during the year (000's) (b)	5,582,033	5,340,426
Basic (loss)/earnings per share (AED) (a)/(b)	(0.09)	0.26

34 Taxation

Taxation resulting from Indian branches' operations and overseas subsidiaries is calculated as per the taxation laws applicable in India and respective overseas subsidiaries.

35 Cash and cash equivalents

Cash and cash equivalents included in the consolidated statement of cash flow comprise the following statement of financial position amounts:

	2009 AED'000	2008 AED'000
Cash and balances with Central Banks Deposits and balances due from banks Due to banks	4,139,015 18,348,988 (4,738,201)	3,911,009 17,528,422 (6,905,263)
Less: Deposits and balances due from banks and cash and	17,749,802	14,534,168
balances with Central Banks – maturity more than 3 months Add: Due to banks – maturity more than 3 months	(919,535) 2,543,652	(488,168) 1,098,109
	19,373,919	15,144,109

36 Related party transactions

The Bank enters into transactions with major shareholders, directors, senior management and their related concerns in the ordinary course of business at commercial interest and commission rates.

Transactions between the Bank and its subsidiaries have been eliminated on consolidation and are not disclosed in this note.

The related parties balances included in the consolidated statement of financial position are as follows:

	2009 AED'000	2008 AED'000
Loans and advances :	1122 000	TIED 000
To Directors	30,296	116,697
To Key Managers	30,776	36,018
	61,072	152,715
Customers' deposits:	<u></u>	 -
From Directors	297,470	14,291
From Major Shareholders	2,368,396	6,611,400
From Key Managers	16,939	8,345
	2,682,805	6,634,036
Mandatory convertible securities :		
From Major Shareholders	800,000	800,000

Related party transactions (continued)

	2009 AED'000	2008 AED'000
Investments in funds managed by the Bank –		
at fair values: Available for sale investments	-	71,283
Irrevocable commitments and contingencies: To Directors	6,064	62,276
Significant transactions with related parties during the year are a	as follows:	
	2009 AED'000	2008 AED'000
Interest, fees and commission income: - Directors	410	1,702
- Key Managers	1,650	588
- Trust activities	60,068	126,376
	62,128	128,666
Interest expense:	45 454	220
DirectorsMajor Shareholders	17,451 31,496	229 66,729
- Key Managers	472	84
	49,419	67,042
Remuneration of key management employees during the year ar	e as follows:	
	2009 AED'000	2008 AED'000
Short term benefits Board of Directors' Remuneration	33,260	45,925 4,750
		
	33,260	50,675

Remuneration of the Board of Directors is accrued and paid as an appropriation from the net profit of the year in accordance with the Federal Law No. 8 applicable to Commercial Companies operating in the U.A.E. The number of key management employees as at December 31, 2009 is 10 (2008: 16 employees).

37 Commitments and contingent liabilities

The Bank had the following commitments and contingent liabilities at December 31:

	2009	2008
	AED'000	AED'000
Commitments on behalf of customers		
Letters of credit	4,107,386	8,682,852
Guarantees	16,077,519	15,989,632
Commitments to extend credit – Revocable	4,791,152	4,278,420
Commitments to extend credit – Irrevocable	18,820,730	18,324,032
Credit default swaps	2,007,017	2,395,094
Othors	45,803,804	49,670,030
Others Commitments for future capital expenditure	190,920	505,590
Commitments to invest in investment securities	245,409	119,579
	46,240,133	50,295,199

Credit-related commitments

Credit-related commitments include commitments to extend credit, standby letters of credit, and guarantees which are designed to meet the requirements of the Bank's customers.

Commitments to extend credit represent contractual commitments to make loans and advances and revolving credits. Commitments generally have fixed expiry dates, or other termination clauses. Since commitments may expire without being drawn upon, the total contract amounts do not necessarily represent future cash requirements.

Letters of credit and guarantees commit the Bank to make payments on behalf of customers contingent upon the failure of the customer to perform under the terms of the contract. These contracts would have market risk if issued or extended at a fixed rate of interest. However, these contracts are primarily made at floating rates.

Commitments and contingent liabilities, which have been entered into on behalf of customers and for which there are corresponding obligations from customers, are not included in assets and liabilities. The Bank's maximum exposure to credit loss, in the event of non-performance by the other party and where all counterclaims, collateral or security proves valueless, is represented by the contractual nominal amount of these instruments included in the table above. These commitments and contingent obligations are subject to the Bank's normal credit approval processes.

Credit default swap means a security with a risk level and pricing level based on the likelihood of credit default by one or more underlying security issuers. Credit default contracts include credit default swaps, credit default index contracts, credit default options and credit default basket options. Credit default contracts are also used as part of the mechanism behind many collateralized debt obligations (CDOs); in these cases, the contracts may have unique covenants that exclude company events, such as a debt restructuring as a "credit event".

37 Commitments and contingent liabilities (continued)

Credit-related commitments (continued)

The Bank's gross exposure and net of provision exposure in credit default swaps amounted to AED 2,222,454 thousand and 2,007,017 thousand respectively (2008 gross exposure and net of provision exposure – AED 2,663,214 thousand and AED 2,395,094 thousand respectively). During the year, an amount of AED 244,550 thousand (Note 32) has been provided (2008 – AED 443,637 thousand) towards expected calls against impaired credit default swaps based on the independent advisor report and recommendations as discussed in Note 11.

38 Business segments

The Bank has adopted IFRS 8 Operating Segments with effect from January 1, 2009. IFRS 8 requires operating segments to be identified on the basis of internal reports about components of the Bank that are regularly reviewed by the Chief Operating Decision Maker in order to allocate resources to the segment and to assess its performance. In contrast, the predecessor Standard (IAS 14 Segmental Reporting) required an entity to identify two set of segments that is business and geographical segment. As a result, following the adoption of IFRS 8, the identification of the Bank's reportable segment has changed.

In prior years, segment information reported externally was analysed on the basis of commercial banking and investment banking. However, information reported to the Management Executive Committee of the Bank as the Chief Operating Decision Maker of the Bank, for the purpose of resource allocation and assessment of performance is more specifically focused on the business segments of the Bank. The business segments as reported under IFRS 8 are wholesale banking, consumer banking and investment and treasury banking. Assets, liabilities and performance information that are not allocated to segments are presented in the following table as corporate support.

Information regarding these segments is presented below. Amounts reported for the prior year have been redesignated to conform to the requirements of IFRS 8.

Notes to the consolidated financial statements for the year ended December 31, 2009 (continued)

38 Business segments (continued)

The following is an analysis of the Bank's revenue and results by operating segment for the year 2009:

	Consumer Banking AED' 000	Wholesale Banking AED' 000	Investments and Treasury AED' 000	Corporate Support AED' 000	Total AED' 000

39 Financial instruments (continued)

39.2 Fair value measurements recognized in the statement of financial position

Fair value represents the amount at which an asset can be exchanged, or a liability settled, between knowledgeable, willing parties in an arm's length transaction. Differences can therefore arise between book value under the historical cost method and fair value estimates.

All financial instruments are recognised initially at fair value. The fair value of a financial instrument on initial recognition is normally the transaction price, i.e. the fair value of the consideration given or received.

- The fair value of financial assets and financial liabilities with standard terms and conditions and traded on active liquid markets is determined with reference to quoted market prices;
- The fair value of other financial assets and financial liabilities (excluding derivative instruments) is determined in accordance with generally accepted pricing models based on discounted cash flow analysis using prices from observable current market transactions and dealer quotes for similar instruments:
- The fair value of derivative instruments is calculated using quoted prices. Where such prices are not available, use is made of discounted cash flow analysis using the applicable yield curve for the duration of the instruments for non-optional derivatives, and option pricing models for optional derivatives.
- The fair value of available for sale monetary assets denominated in a foreign currency is determined in that foreign currency and translated at the spot rate at the balance sheet date. The change in fair value attributable to translation differences that result from a change in amortised cost of the asset is recognised in the consolidated income statement, and other changes are recognised in equity.

IFRS 7 specifies a hierarchy of valuation techniques based on whether the inputs to those valuation techniques are observable or unobservable. Observable inputs reflect market data obtained from independent sources; unobservable inputs reflect the Bank's market assumptions. These two types of inputs have created the following fair value hierarchy:

- Level 1 fair value measurements are those derived from quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2 fair value measurements are those derived from inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices).
- Level 3 fair value measurements are those derived from valuation techniques that include inputs for the asset or liability that are not based on observable market data (unobservable inputs). This level includes equity investments and debt instruments with significant unobservable components.

39 Financial instruments (continued)

39.2 Fair value measurements recognized in the statement of financial position (continued)

This hierarchy requires the use of observable market data when available. The Bank considers relevant and observable market prices in its valuations where possible.

40 Credit risk frame work, measurement, monitoring and policies

Credit risk is the risk that one party to a financial instrument will fail to discharge an obligation and cause the other party to incur a financial loss. The Bank attempts to control credit risk by monitoring credit exposures, limiting transactions with specific counterparties and continually assessing the creditworthiness of counterparties. In addition to monitoring credit limits, the Bank manages the credit exposure relating to its trading activities by entering into master netting agreements and collateral arrangements with counterparties in appropriate circumstances and limiting the duration of exposure. In certain cases, the Bank may also close out transactions or assign them to other counterparties to mitigate credit risk.

Concentrations of credit risk arise when a number of counterparties are engaged in similar business activities, or activities in the same geographic region, or have similar economic features that would cause their ability to meet contractual obligations to be similarly affected by changes in economic, political or other conditions. Concentrations of credit risk indicate the relative sensitivity of the Bank's performance to developments affecting a particular industry or geographic location.

As at reporting date, 30% of the loans and advances is concentrated by 12 customers (2008 - 28% is concentrated by 12 customers).

40 Credit risk frame work, measurement, monitoring and policies (continued)

Management of credit risk

The Bank's credit risk management framework includes:

- Establishment of authorisation structure and limits for the approval and renewal of credit facilities;
- Reviewing and assessing credit exposures in accordance with authorisation structure and limits, prior to facilities being sanctioned to customers. Renewals and reviews of facilities are subject to the same review process;
- Diversification of lending and investment activities;
- Limiting concentrations of exposure to industry sectors, geographic locations and counterparties; and
- Reviewing compliance, on an ongoing basis, with agreed exposure limits relating to counterparties, industries and countries and reviewing limits in accordance with the risk management strategy and market trends.

The Board Risk and Credit Committee (BRCC) is responsible for sanctioning high value credits and the Credit Policy Committee is responsible for the formulation of credit policies and processes in line with growth, risk management and strategic objectives.

In addition, the Bank manages the credit exposure by obtaining security where appropriate and limiting the duration of exposure. Credit risk in respect of derivative financial instruments is limited to those with positive fair values.

Regular audits of business units and the Bank's credit processes are undertaken by the Internal Audit and Compliance Division.

For details of the composition of the loans and advances portfolio refer to Note 9. Information on credit risk relating to derivative instruments is provided in Note 10.

Credit risk measurement

The Bank assesses the probability of default of individual counterparties using internal rating tools tailored to the various categories of counterparties. They have been developed internally and combine statistical analysis with credit officer judgment and are validated, where appropriate, by comparison with externally available data.

The rating tools are kept under review and upgraded as necessary. The Bank is in the process of implementing a new solution for calculation of probability of default through best in practice tools that are Basel II compliant.

40 Credit risk frame work, measurement, monitoring and policies (continued)

Credit risk measurement (continued)

Risk limit control and mitigation policies

The Bank manages limits and controls concentrations of credit risk wherever they are identified – in particular, to individual counterparties and banks, and to industries and countries.

The Bank structures the levels of credit risk it undertakes by placing limits on the amount of risk accepted in relation to one borrower, or group of borrowers and to geographical and industry segments. Such risks are monitored on a revolving basis and subject to an annual or more frequent review and are approved by the BRCC, when considered necessary. These limits are set with respect to product, country and industry sector.

The exposure to any one borrower including banks and brokers is further restricted by sub-limits. Actual exposures against limits are monitored on a daily basis.

Exposure to credit risk is also managed through regular analysis of the ability of borrowers and potential borrowers to meet interest and capital repayment obligations and by changing these lending limits where appropriate.

(a) Collateral

The Bank employs a range of policies and practices to mitigate credit risk. The most traditional of these is the taking of securities for funds advances, which is a common practice. The Bank implements guidelines on the acceptability of specific classes of collateral or credit risk mitigation. The principal collateral types for loans and advances are:

- Cash and marketable securities
- Mortgages over residential and commercial properties;
- Charges over business assets such as premises, inventory and accounts receivable;
- Charges over financial instruments such as debt securities and equities.

(b) Derivatives

The Bank maintains strict control limits on net open derivative positions (i.e. the difference between purchase and sale contracts), by both amount and term. At any time, the amount subject to credit risk is limited to the current fair value of instruments that are favourable to the Bank (i.e. positive fair value of assets), which in relation to derivatives is only a small fraction of the contract, or notional values used to express the volume of instruments outstanding. This credit risk exposure is managed as part of the overall lending limits with customers, together with potential exposures from market movements.

Collateral or other security is not usually obtained for credit risk exposures on these instruments, except where the Bank requires margin deposits from counterparties.

40 Credit risk frame work, measurement, monitoring and policies (continued)

Risk limit control and mitigation policies (continued)

(b) Derivatives (continued)

Settlement risk arises in any situation where a payment in cash, securities or equities is made in the expectation of a corresponding receipt in cash, securities or equities. Daily settlement limits are established for each counterparty to cover the aggregate of all settlement risks arising from the Bank's market transactions on any single day.

(c) Master netting arrangements

The Bank further restricts its exposure to credit losses by entering into master netting arrangements with counterparties with which it undertakes a significant volume of transactions. Master netting arrangements do not generally result in an offset of statement of financial position assets and liabilities, as transactions are usually settled on a gross basis. However, the credit risk associated with favourable contracts is reduced by a master netting arrangement to the extent that if a default occurs, all amounts with the counterparty are terminated and settled on a net basis. The Bank's overall exposure to credit risk on derivative instruments subject to master netting arrangements can change substantially within a short year, as it is affected by each transaction subject to the arrangement.

42 Interest rate risk framework, measurement and monitoring

Financial assets and liabilities exposed to cash flow interest rate risk are financial assets and financial liabilities with either a fixed or a floating contractual rate of interest. A significant portion of the Bank's loans and advances, due from banks, investment securities, customer deposits, due to banks, short and medium term borrowings, capital notes, long term borrowings and mandatory convertible securities fall under this category.

Financial assets that are not subject to any fair value or cash flow interest rate risk mainly comprise of investments in equity instruments.

The effective interest rate (effective yield) of a monetary financial instrument is the rate of interest that, when used in a present value calculation, would result in the carrying amount of the instrument. The rate is a historical rate for a fixed rate instrument carried at amortized cost and a current market rate for a floating rate instrument or an instrument carried at fair value.

The off balance sheet gap represents the net notional amounts of the off balance sheet financial instruments, such as interest rate swaps which are used to manage the interest rate risk.

Interest rate risk arises from interest bearing financial instruments and reflects the possibility that changes in interest rates will adversely affect the value of the financial instruments and the related income. The Bank manages this risk principally through monitoring interest rate gaps and by matching the re-pricing profile of assets and liabilities.

Overall interest rate risk positions are managed by the Bank's Treasury division, which uses linear and non-linear financial instruments to manage the overall position arising from the Bank's interest bearing financial instruments.

The Bank uses financial simulation tools to periodically measure and monitor interest rate sensitivity. The results are analyzed and monitored by the Asset and Liability Committee (ALCO). Since most of the Bank's financial assets and liabilities accrue a floating rate of interest, such as deposits and loans generally repricing simultaneously, this provides a natural hedge which reduces exposure to changing levels of interest rates. Moreover, a majority of the Bank's assets and liabilities reprice with at least a yearly frequency or more frequently, thereby further limiting interest rate risk.

Notes to the consolidated financial statements for the year ended December 31, 2009 (continued)

42 Interest rate risk framework, measurement and monitoring (continued)

The Bank's interest sensitivity position based on contractual repricing arrangements at December 31, 2009 was as follows:

December 31, 2009	Effective rate	Less than 3 months AED'000	3 months to less than 6 months AED'000	6 months to less than 1 year AED'000	1 year to less than 3 years AED'000	Over 3 years AED'000	Non-interest bearing items AED'000	Total AED'000

Included in investment securities are interest bearing amounts of AED 281,509 thousand relating to the Bank's overseas branches with effective rate of 7.54%.

43 Liquidity risk framework, measurement and monitoring

Liquidity risk is the risk that the Bank will be unable to meet its payment obligations associated with its financial liabilities when they fall due and to replace funds when they are withdrawn. The consequence may be the failure to meet obligations to repay depositors and fulfill commitments to lend.

Liquidity risk can be caused by market disruptions or a credit downgrade which may cause certain sources of funding to dry up immediately. To guard against this risk, the Bank's management has diversified funding sources and assets are managed with liquidity in mind, maintaining a healthy balance of cash, cash equivalents and readily marketable securities.

Liquidity risk management process

The Assets and Liabilities Committee (ALCO) of the Bank sets and monitors liquidity ratios and regularly revises and updates the Bank's liquidity management policies to ensure that the Bank is in a position to meet its obligations as they fall due.

The Bank's liquidity management process, as carried out within the Bank and monitored by Bank's Treasury, includes:

- Day-to-day funding managed by monitoring future cash flows to ensure that requirements can be met.
 These include replenishment of funds as they mature or are borrowed by customers. The Bank maintains an active presence in global money markets to enable this to happen;
- Maintaining a portfolio of highly marketable assets that can easily be liquidated as protection against any unforeseen interruption to cash flow;
- Monitoring statement of financial position liquidity ratios against internal and regulatory requirements; and
- Managing the concentration and profile of debt maturities.

Monitoring and reporting take the form of cash flow measurement and projections for the next day, week and month respectively, as these are key periods for liquidity management. The starting point for those projections is an analysis of the contractual maturity of the financial liabilities and the expected collection date of the financial assets.

The Bank has set an internal ceiling on the Advances to Stable Resources that should not be higher than 1:1 between:

- the amount of loans and advances together with the amount of inter bank placements with a remaining life of more than three months and;
- the amount of stable resource comprising of "free own funds", a remaining life of more than six months, "stable customer deposits", and standby liquidity facilities.

The above definitions are in line with the Central Bank of United Arab Emirates definitions of the Advances to Deposits Ratio.

43 Liquidity risk framework, measurement and monitoring (continued)

Liquidity risk management process (continued)

The Bank also monitors composition of funding sources at granular level and has set triggers for avoiding concentration of funding sources. The concentration of funding sources is monitored as percentage of the total statement of financial position. Some of the ratios for monitoring are as follows:

- Euro Commercial Paper to Total Liabilities
- Wholesale Funds to Total Liabilities
- Money Market Deposits to Total Liabilities
- Core Funds to Total Liabilities
- Non-Core Funds to Total Liabilities

The Bank also has unsecured standby facilities of USD 25,000 thousand (2008 – USD 175,000 thousand) to fund its liquidity needs (Note 19).

Funding approach

ADCB pursues a diversified funding construct including, Retail Funding, liabilities for Corporate and financial institutions as well as professional counterparts and capital markets. These sources of liquidity are regularly monitored by the Asset and Liability Committee to ensure sustainability and diversification by provider, product and term.

Bank identifies the core component of Cash or On-demand accounts like savings and current account and treats these as sources of long term retail funding.

Long term capital market issues, secured and un-secured funding lines from institutional investor also form part of funding sources.

Central bank facilities, repo facilities are also part of the funding source available which help to diversify the funding source available to the bank.

The table below summarizes the maturity profile of the Bank's assets and liabilities. The contractual maturities of assets and liabilities have been determined on the basis of the remaining period at the end of the reporting period date to the contractual maturity date and do not take into account the effective maturities as indicated by the Bank's deposit retention history and the availability of liquid funds. The maturity profile is monitored by management to ensure adequate liquidity is maintained.

44 Foreign exchange risk framework, measurement and monitoring

The Bank takes on exposure to the effects of fluctuations in the prevailing foreign currency exchange rates on its financial position and cash flows. The Board of Directors sets limits on the level of exposure by currency and in aggregate for both overnight and intra-day positions, which are monitored on daily basis. At December 31, the Bank had the following significant net exposures denominated in foreign currencies:

	2009 AED'000 equivalent	2008 AED'000 equivalent
	long/(short)	long/(short)
US\$	(8,685,085)	(7,312,885)

45 Market risk framework, measurement and monitoring

Market risk is the risk that the Bank's income and/or value of a financial instrument will fluctuate because of changes in market risk factors such as interest rates, foreign exchange rates, equity prices, commodities prices and options' volatilities.

Market price risk

Market price risk is the risk that the value of a financial instrument will fluctuate as a result of changes in market prices, whether those changes are caused by factors specific to the individual security, or its issuer, or factors affecting all securities traded in the market. The Bank is exposed to market risk with respect to its investments in marketable securities and other financial instruments like derivatives. The Bank limits market risks by maintaining a diversified portfolio and by the continuous monitoring of developments in the market. In addition, the Bank actively monitors the key factors that affect stock and market movements, including analysis of the operational and financial performance of investees.

Management of market risk

The Board of Directors have set risk limits based on the sensitivity analysis and notional limits which are closely monitored by the Risk Management Division, reported regularly to the Senior Management and discussed by ALCO.

The Bank's activities expose it primarily to the financial risk of changes in foreign currency exchange rates and interest rates. The Bank enters into a variety of derivative financial instruments to manage its exposure to interest rate and foreign exchange risk.

Market risk is identified, measured, monitored, and controlled by an independent risk control function. Market risk management aims to reduce volatility in operating performance and make the Bank's market risk profile transparent to Senior Management, the Board of Directors and Regulators.

Market risk management is overseen by the Management Risk and Credit Committee (MRCC) and performs the following primary functions:

- Establishment of a comprehensive market risk policy framework;
- Independent measurement, monitoring and control of market risk;
- Setting up, approval and monitoring of limits.

45 Market risk framework, measurement and monitoring (continued)

Risk identification and classification

The MRCC identifies and classifies market risk for the Bank and puts in place risk management policies and procedures. All business segments are responsible for comprehensive identification and verification of market risks within their business units. Regular meetings are held between market risk management and the heads of risk taking businesses to discuss and decide on risk exposures in the context of the market environment.

The Bank separates its exposure to market risk between trading and non-trading portfolios. Trading portfolios are held by the Treasury and Derivatives Division, and include positions arising from market making and proprietary position taking, together with financial assets and liabilities that are managed on a fair value basis.

Market risk is broadly classified into trading and non-trading categories:

Trading risk

Market risk which includes interest rate risk, foreign exchange, equities and commodities and other trading risks involve the potential decline in net income or financial condition due to adverse changes in market rates.

Trading risk includes positions that are held by the Bank's trading unit whose main business strategy is to trade or make markets. Unrealised gains and losses in these positions are generally reported in principal transactions under consolidated income statement.

Non-trading risk

Non-trading risk arises from execution of the Bank's core business strategies, products and services to its customers, and the strategic positions the Bank undertakes to manage risk exposures.

These exposures can result from a variety of factors including but not limited to re-pricing of gaps in assets, liabilities and off-balance sheet instruments and changes in the level and shape of market interest rate curves.

Non-trading risk includes securities and other assets held for longer-term investment in securities and derivatives used to manage the Bank's asset/liability exposures. Unrealised gains and losses in these positions are generally not reported in principal transactions revenue.

Risk measurement

The following are the tools used to measure the market risk, because no single measure can reflect all aspects of market risk, the Bank uses various matrices, both statistical and non-statistical, including:

- Non-statistical risk measures; and
- Sensitivity analysis

45 Market risk framework, measurement and monitoring (continued)

Non-statistical risk measures

Non-statistical risk measures, other than stress testing, include net open positions, basis point values, option sensitivities, market values, position concentrations and position turnover. These measures provide granular information on the Bank's market risk exposure.

The Bank uses non-statistical scenario based risk limits to monitor and control market risk on a day to day basis.

Sensitivity Analysis

The scenarios used for interest rate risk assess the change in the portfolio to parallel and non-parallel rate shocks. The non-parallel rate shocks simulate steepening, bending and twisting interest rate scenarios.

Portfolio sensitivity for major interest rate and foreign currency exchange rate risks (parallel rate shock) is analysed separately for the Bank's trading portfolio as follows:

Market risk - Trading portfolio

The following table depicts the sensitivity of fair valuations in the Trading Book to hypothetical, instantaneous changes in the level of interest rates - with other market risk factors held constant – which would have an impact on the Bank's consolidated income statement:

Interest rate risk

Parallel Rate Moves in AED interest rate basis point (AED '000):

	+200 bps	+100 bps	-100 bps	-200 bps				
December 31, 2009	55,246	25,736	(20,382)	(33,303)				
December 31, 2008	(4,605)	(7,168)	20,185	57,299				
Parallel Rate Moves in US\$ interest rate basis point (AED '000):								
	+200 bps	+100 bps	-100 bps	-200 bps				
December 31, 2009	(49,565)	(22,300)	9,335	6,475				
December 31, 2008	3,648	7,894	(25,388)	(73,833)				

45 Market risk framework, measurement and monitoring (continued)

Market risk - Trading portfolio (continued)

Currency wise

The following table depicts the sensitivity of fair valuations in the Trading Book to hypothetical, instantaneous changes in the level of foreign currency exchange rates - with other market risk factors held constant – which would have an impact on the Bank's consolidated income statement:

Price Shock in Percentage (AED '000)

December 31, 2009		+10%	+5%	-5%	-10%
	AUD	168	84	(84)	(168)
	EUR	(43)	(21)	21	43
	GBP	(11)	(5)	5	11
	JPY	(64)	(32)	32	64
	US\$	(6,998)	(3,655)	4,051	8,553
Price Shock in Percentage	e (AED '000):				
December 31, 2008		+10%	+5%	-5%	-10%
	AUD	929	417	(94)	239
	EUR	(48)	(24)	24	48
	GBP	(10)	(5)	5	10
	JPY	(130)	(65)	65	130
	US\$	(4,566)	(2,369)	2,960	6,354

Market risk - Non-trading portfolio

Portfolio sensitivity for major interest rate risk (parallel rate shock) is analysed separately for the Bank's non-trading portfolio as follows:

45 Market risk framework, measurement and monitoring (continued)

Market risk – Non-trading portfolio (continued)

Interest rate risk

The following table demonstrates the sensitivity to a reasonable possible change in interest rates, with all other variables held constant, and the impact of the Bank's consolidated income statement from Bank's non-trading portfolio.

The sensitivity of the income statement is the effect of the assumed changes in interest rates on the net interest income for one year, based on the floating rate non-trading financial assets and financial liabilities, including the effect of hedging instruments. The sensitivity of equity is based on the assumption that there are parallel shifts in the yield curve.

	Change in basis points	Sensitivity of net interest income	Sensitivity of equity
		AED'000	AED'000
December 31, 2009	+25	48,760	(11,190)
	-25	(48,760)	11,190
December 31, 2008	+25	55,148	(29,996)
	-25	(55,148)	29,996

Operational risk

Operational risk is the risk of loss arising from system failure, human error, fraud or external events. When controls fail to perform, operational risks can cause damage to reputation, have legal or regulatory implications, or lead to financial loss. The Bank cannot expect to eliminate all operational risks, but through a control framework and by monitoring and responding to potential risks, the Bank is able to manage the risks. Controls include effective segregation of duties, access, authorisation and reconciliation procedures, staff education and assessment processes, including the use of internal audit.

Equity price risk

Equity price risk is the risk that the fair values of equities decrease as the result of changes in the levels of equity indices and the value of individual stocks. The trading and non-trading equity price risk exposure arises from the Bank's investment portfolio.

46 Foreign currency balances

Net assets amounting to the Indian Rupee equivalent of AED 92,459 thousand (2008 – AED 73,243 thousand) held in India are subject to the exchange control regulations of India.

47 Trust activities

As at December 31, 2009, the net asset value of the funds under the management of the Bank amounted to AED 1,980,119 thousand (2008 – AED 1,137,801 thousand).

48 List of subsidiaries

The entities (other than the associates) have been treated as subsidiaries for the purpose of consolidation as the Bank has control over their financial and operating policies, has invested all or a majority of capital of these entities and is entitled to all or a majority of their profits/losses. The Bank's interest, held directly or indirectly, in the subsidiaries are as follows:

Name of subsidiary	Proportion of ownership interest	Year of incorporation	Country of incorporation	Principal activities
Al Dhabi Brokerage Services L.L.C.	100%	2005	U.A.E.	Agent in trading of financial instruments and stocks.
Abu Dhabi Risk and Treasury Solutions L.L.C. (note (i) below)	51%	2005	U.A.E.	Providing computer software and design in relation to risk and treasury solutions.
Abu Dhabi Commercial Properties L.L.C.	100%	2005	U.A.E.	Real estate property management and advisory services.
Abu Dhabi Commercial Engineering Services L.L.C.	100%	2007	U.A.E.	Engineering services.
ADCB Holdings (Cayman) Limited	100%	2008	Cayman Islands	Holding company.
ADCB Holdings (Labuan) Limited	100%	2008	Malaysia	Holding company.
ADCB Holdings (Malaysia) Sdn Bhd	100%	2008	Malaysia	Investment holding company.
ADCB Finance (Cayman) Limited	100%	2008	Cayman Islands	Treasury financing activities.
Abu Dhabi Commercial Islamic Finance P.S.C.	100%	2009	U.A.E.	Islamic banking.
Abu Dhabi Commercial Property Development L.L.C. (*)	100%	2006	U.A.E.	Property development.
Abu Dhabi Commercial Properties Consultancy L.L.C. (*)	100%	2008	U.A.E.	Real estate consultancy.

Notes to the consolidated financial statements for the year ended December 31, 2009 (continued)

48 List of subsidiaries (continued)

Name of subsidiary	Proportion of ownership interest	Year of incorporation	Country of incorporation	Principal activities
Abu Dhabi Commercial Finance Solutions L.L.C. (*)	100%	2005	U.A.E.	Financial investments.
Abu Dhabi Commercial Investment Services L.L.C. (*)	100%	2005	U.A.E.	Financial investments.
Abu Dhabi Commercial Bank (UK) Limited(*)	100%	2008	United Kingdom	Process service agent.
Abu Dhabi Commercial Projects Services L.L.C. (*)	100%	2006	U.A.E.	Holding company for infrastructure investments.
Kinetic Infrastructure Development L.L.C. (*)	100%	2006	U.A.E.	Infrastructure projects and real estate development.
Al Reem Infrastructure Development L.L.C. (formerly known as Expansion Contracting L.L.C.) (*)	100%	2006	U.A.E.	Investment in commercial projects.
ADCB Fund Management S.A.R.L.	100%	2009	Luxembourg	Fund management company.
Al Nokhitha Investments Feeder Fund	100%	2009	Luxembourg	Mutual Fund.
MSCI UAE Index Feeder Fund	82%	2009	Luxembourg	Mutual Fund.
ADCB MSCI Arabian Markets Index Fund (note (ii) below)	100%	2009	Luxembourg	Mutual Fund.
ADCB MSCI Arabian Markets Index Feeder Fund	100%	2009	Luxembourg	Mutual Fund.
ACB LTIP (IOM) Limited	Controlling interest	2008	Isle of man	Trust activities.

^(*) These subsidiaries are dormant.

48 List of subsidiaries (continued)

(i) The Bank shares its profit in Abu Dhabi Risk & Treasury Solutions L.L.C. in accordance with a separate agreement with the minority shareholders, as follows:

	Bank	Minority shareholders
Up to year 2011	51%	49%
Year 2012 to year 2015	75%	25%

The agreement also provides that the minority shareholders will not share any losses which are incurred as a consequence of the failure of a counterparty to perform its obligation to the subsidiary, Abu Dhabi Risk & Treasury Solutions L.L.C.

(ii) The Bank also holds 39% in ADCB MSCI Arabian Markets Index Fund through its 100% subsidiary ADCB MSCI Arabian Markets Index Feeder Fund. Accordingly, effective holding of the Bank in ADCB MSCI Arabian Markets Index Fund comes to 96% (Note 11)

49 Capital adequacy and capital management

Capital management process

The Bank's objectives when managing capital, which is a broader concept than the 'equity' on the face of statement of financial position, are:

- To comply with the capital requirements set by the Central Bank of United Arab Emirates;
- To safeguard the Bank's ability to continue as a going concern and increase the returns for the shareholders; and
- To maintain a strong capital base to support the development of its business.

Capital adequacy and the use of regulatory capital are monitored on a regular basis by the Bank's management, employing techniques based on the guidelines developed by the Basel Committee and the Central Bank of United Arab Emirates. The required information is filed with the regulators on a monthly basis.

The U.A.E. Central Bank vide its circular No. 27/2009 dated November 17, 2009 informed all the Banks operating in the U.A.E. to implement Standardised approach of Basel II from the date of the circular. For credit and market risk, the Central Bank has previously issued draft guideline for implementation of Standardised approach and Banks are expected to comply and report under pillar 2 – Internal Capital Adequacy Assessment Process (ICAAP) requirements by March 2010. For operational risk, the Central Bank has given Banks the option to use the Basic Indicators approach or the Standardised approach and the Bank has chosen to use the Standardised approach. Banks in the U.A.E. are currently on a parallel run on Basel I and Basel II.

Further, all Banks operating in the U.A.E. are required to maintain a capital adequacy ratio at a minimum of 11% at all times increasing to 12% by June 30, 2010.

49 Capital adequacy and capital management (continued)

The ratios calculated in accordance with Basel II and Basel I are as follows:

	Basel II		Basel I

Capital adequacy ratio	17.38%	11.37%	16.77%	10.87%	

49 Capital adequacy and capital management (continued)

In accordance with the U.A.E. Central Bank guidelines, the collective impairment allowance on loans and advances is adjusted from the carrying value of loans and advances for computing the risk weighted assets. The capital adequacy ratio under these guidelines was 15.89% (2008 - 10.14%).

The capital adequacy ratio was above the minimum requirement of 11% for December 31, 2009 (December 31, 2008 - 10%) stipulated by the U.A.E. Central Bank.

50 Comparative figures

Certain comparative figures for the prior year have been reclassified, where necessary, to conform with the current year presentation.

51 Approval of the consolidated financial statements

The consolidated financial statements were approved by the Board of Directors and authorised for issue on January 26, 2010.
