UAE economic overview
Underlying economic environment remains solid despite lower oil price

Highlights

- Second largest economy in the GCC, FY’15 nominal GDP estimated at US$ 364 bn, with a population of 9.6 mn (IMF)
- Real GDP growth of 3.6% in 2014E and 3.2% in 2015E (IMF)
- GDP growth is expected to be driven by the non-oil sector, which is forecast to expand by 4.8-5% in 2015
- Oil output remained steady, in line with OPEC policy at 2.7 mn barrels a day (EIA), continued investment in hydrocarbon sector
- UAE’s economic outlook remains positive, supported by its more diversified nature, although challenges have increased with the sharply weaker oil price
- Non-oil private sector continues to show solid growth, albeit decelerating from 2014 with lower oil prices, Dubai housing market pullback and strong USD. Weaker project awards in 1Q2015, although progress expected with core projects
- According to IMF fiscal deficit is expected to reach 2.3% of GDP in 2015

“The deficit poses no threat to the UAE economy, at today’s oil prices, the UAE could keep spending at current levels for at least 30-40 years, drawing on its ample financial reserves.”

Zeine Zeidane, IMF Representative*

- According to the Sovereign Wealth Fund (SWF) Institute, GCC-based SWFs have a total of $2.6 trillion in assets (37% of total SWF assets globally). At $773 bn, Abu Dhabi Investment Authority (ADIA) is the second largest SWF globally. In total, UAE’s SWFs have assets of just over $1 trillion providing a considerable buffer to support the UAE economy

UAE project awards weaker in 1Q; yet progress expected with core projects

PMI data shows that private sector activity remained solid in 1Q’15 (reading above 50 indicates expansion)

UAE Deposit and Liquidity Developments
The banking system maintains significant capital and liquidity buffers

**Highlights**

- Ample liquidity in the banking sector, interbank rates remain low despite rising moderately from their end-2014 levels and continue to reflect a comfortable liquidity position in the banking sector.
- Credit growth outpaced deposit growth in April, resulting in a rise in the LTD ratio.
- Deposits fell 0.6% m-o-m in April, with both resident and non-resident deposits contracting.
- FX reserves provide government with a strong ability to increase deposits in the banking sector if required.
- As at 31 March 2015, industry wide average Tier I ratio and CAR were 16.2% and 18.2% respectively.

Ample liquidity in the Banking sector reflected in UAE interbank rates falling and narrowing spread with Libor.

Recognised as a regional leader in Corporate Governance

- Maintain high standards in Corporate Governance winning several external awards in 2014, including “Best Corporate Governance in UAE” from World Finance Magazine and for the second time in three years, the Hawakamah Bank Corporate Governance Award

- The Bank’s governance structure is headed by the Board which has overall responsibility for guiding the Bank

- The Bank has a number of Board committees and management committees which oversee and monitor day to day activities of the Bank

- Our reporting lines are an important part of our governance structure:
  - Chief Risk Officer is independent and reports to the Board Risk Credit Committee (BRCC)
  - Head of Internal Audit is independent and reports to the Board Audit & Compliance Committee (BACC)
  - Board Secretary is independent and has a dual reporting line to the Board and the CEO

- The Bank appointed Sir Gerry Grimstone as an independent Adviser to its Board of Directors – Chairman of Standard Life

- During 2013, Aysha Al Hallami was appointed as Director, first woman to be appointed to the Bank’s Board of Directors, in line with international trends and the Bank’s efforts to promote greater diversity at the Board level
Effective risk management is fundamental to our core strategy

### Highlights

- Our risk appetite is approved by the Board
- Continue to upgrade our risk management capabilities and strict enforcement of discipline is applied on the business side using measures such as RAROC (Risk adjusted Return on Capital)
- As a result of this continuing discipline our portfolio achieved the following results:
  - **Top 20 obligor concentration:** Top 20 largest customer exposure reduced from 41.4% of gross loans in 2013 to 37.04% in 2014
  - **Granular business growth:** Significant growth in granular businesses as per risk strategy — Retail, Mid-Corporate (MCD) and SME. Retail lending grew by 22%, SME loans grew by 40%, and MCD loans grew by 123% year on year
  - **Portfolio rating:** Average portfolio rating is 5+ (equivalent to S&P BB+) as at 31 December 2014. This is a one-notch upgrade since year-end 2013 and a two-notch upgrade since 2012
- Our capital adequacy ratio remains above UAE Central Bank hurdle rate and amongst the strongest in the country. Continued work on enhancing our risk management capabilities will help us to prepare for Basel III requirements

### Three lines of defence

#### First line
ADCB’s business units including all business areas and functions are accountable for owning and managing the risks which exist in their area within a defined risk appetite framework

#### Second line
Independent monitoring and control functions are accountable for owning and developing the risk and control frameworks. The second line of defense is independent from the business and accountable for overseeing and challenging the first line of defense on the effective management of its risks

#### Third line
Group Internal Audit and External Audit provide independent assurance on the appropriateness of the design and operational effectiveness of risk management and internal control processes that mitigate ADCB’s key risks

**Strong CASA (current & savings account) deposits contribution**

As at 31 March 2015

- Total assets reached AED 207 bn, up 1% over 31 December 2014. Gross loans and advances increased by AED 502 mn to AED 147,842 mn as at 31 March 2015.

- Total customer deposits increased 2% to AED 128,471 mn. CASA¹ deposits increased by AED 2.1 bn over December 2014, contributing 46% of total customer deposits.

- Advances to stable resources was 86.6% and loan to deposit ratio was 109.83% compared to 111.55% as at 31 December 2014.

- Capital adequacy ratio was 19.49% compared to 21.03% as at 31 December 2014. The decline in CAR was mainly on account of dividend payments of AED 2.1 bn in Q1’15 and a change in asset mix.

- Investment securities portfolio totaled AED 21,678 mn, with 98% of the portfolio invested in available for sale investments in fixed income securities.

Appendix
“… ADCB has a high-quality management team. By focusing on improving deposit granularity, increasing the amount of low-cost current account deposits and lengthening funding tenors, the bank has improved its funding profile substantially since 2008. As the bank sharply decelerated lending growth in the same period, its liquidity metrics improved visibly…”

“… We regard ADCB’s capital and earnings as "strong." This reflects the bank’s high level of capital, its strong core earnings generation, and manageable dividend payout policy, which enables it to maintain its capitalization. …”

STANDARD &POOR’S

“… ADCB is well funded by customer deposits due to its strong franchise and links to the Abu Dhabi government …”

“… the bank’s liquidity position is supported by a good stock of highly liquid assets and a very diverse funding mix. Capital has improved significantly over the last four years due to a series of capital-strengthening measures …”
