Highlights

- Improved margins and yields on account of increased volumes and a shift in asset mix toward higher yielding interest earning assets, combined with improved recoveries and higher interest in suspense reversals.

- Non-interest income was up 6% year on year at AED 2,055 mn in 2015, mainly on account of higher fees and commission income, which was offset by lower trading income.

- Net fees and commission income accounted for 70% of total non-interest income in 2015, compared to 64% in 2014.

- Net trading income for 2015 was 14% lower year on year, on account of funds de-consolidation on 31 March 2014. Excluding the impact of the funds de-consolidation in 2014, net trading income increased 37% year on year, and non-interest income was up 14% over 2014.

Evolution of cost of funds (%)

Cost of funds increased slightly from 0.89% in 2014 to 0.92% in 2015, primarily on account of higher EIBOR/LIBOR and higher spreads on time deposits gathered in Q4’15.

The increase in customer deposits resulted in an improvement of the Bank’s loan to deposit ratio from 111.55% in 2014 to 107.07% in 2015, while the Bank’s CASA deposits remained stable year on year comprising 44% of total customer deposits as at 31 December 2015.

Cost to income ratio for 2015 was 34.2%, remaining stable over 2014. Ongoing bank wide cost management initiatives enabled the Bank to maintain a cost to income ratio within our target range.

Operating expenses for 2015 were AED 2,827 mn, an increase of 10% year on year. The increase in staff costs reflected increases in the personnel needed to support our granular approach to growth.

Effective risk management is fundamental to our core strategy

Highlights

- Our risk appetite is approved by the Board
- Continue to upgrade our risk management capabilities and strict enforcement of discipline is applied on the business side using measures such as RAROC (Risk adjusted Return on Capital)

As a result of this continuing discipline our portfolio achieved the following results:

- Top 20 largest customer exposure reduced from 37.04% of gross loans in 2014 to 35.26% in 2015
- NPL rate of 3% lower than last year’s
- Provision coverage of 128.5% remained conservatively cushioned
- Average portfolio quality has remained stable, notwithstanding a negative trend in credit conditions
- LCR is well above BCBS (Basel Committee on Banking Supervision) standard requirements at this time
- Concentration reduction by name and sector
- Our capital adequacy ratio remains above UAE Central Bank hurdle rate and amongst the strongest in the country. Continued work on enhancing our risk management capabilities will help us to prepare for Basel III requirements

Three lines of defence

First line
ADCB’s business units including all business areas and functions are accountable for owning and managing the risks which exist in their area within a defined risk appetite framework

Second line
Independent monitoring and control functions are accountable for owning and developing the risk and control frameworks. The second line of defense is independent from the business and accountable for overseeing and challenging the first line of defense on the effective management of its risks

Third line
Group Internal Audit and External Audit provide independent assurance on the appropriateness of the design and operational effectiveness of risk management and internal control processes that mitigate ADCB’s key risks

Business overview

Macro overview

Appendix
UAE’s economy is showing signs of a contained slow down on the back of sharply weaker oil price, softening real estate prices in Dubai, the strong USD, and gradual fiscal and monetary tightening

Nevertheless continuation of core investment projects, healthy performance of key service sectors (such as tourism and transportation), diverse economic base and strong FX reserves support the economic outlook

Expect headline real GDP growth moderate to 2.7% in 2016 from 3.1% in 2015 and real non-oil GDP growth decelerate to 2.5% from 3% in 2015

UAE oil production rose 4.1% YoY in 2015 to an average of 2.88 million bpd, oil production forecast to remain strong going forward

PMI data reflects the softening in non-oil activity with weakening in new non-oil export orders. Wider data still indicate core sectors (tourism, transportation & logistics) seeing solid growth

Real non-oil GDP growth should start to strengthen from 2017 onwards as the pace of investment likely to accelerate ahead of Dubai Expo 2020

Non-oil sector to benefit from loosening Iran sanctions in 2016, pick up in Iran’s economic activity should boost trade and financial flows with the UAE

UAE annual average inflation to moderate with lower fuel prices in 2016

The reforms include a reduction in utility subsidies in Abu Dhabi, (introduced in January) and UAE wide fuel (diesel and gasoline) price liberalisation (since August)

UAE’s average oil production higher in 2015, with aim of retaining market share

Total UAE project awards fall, but progress continues with core projects

Positive contribution to headline GDP growth from both oil and non-oil sectors to moderate

UAE banks overview: Liquidity tightening
Credit growth continues to outstrip deposit growth

- UAE Banking sector is ranked largest in the GCC in terms of assets, comprises of 23 local banks with 874 branches and 26 foreign banks with 86 branches
- YoY credit growth (7.4% in January 2016) outstripping deposit growth (4.2%)
- Some improvement in Government and GRE net deposits at the end of 2015, with a pickup in GRE deposits in the banking system and a slight moderation in government borrowing
- Private sector credit growth stood at 7.6% YoY in January 2016, down from 12.7% YoY in January 2015. There has been a deceleration credit growth to corporate credit growth, whilst retail credit growth has generally been stronger
- Interbank lending rates increased from their lows seen in 2015 as banking sector liquidity tightened and with the expectations of a rate hike in the US. Interbank rates have ticked down marginally in early 2016
- Banking sector is strongly capitalised, and has ample provisions to deal with the expected slowdown in economic activity

Retail credit growth stronger than corporate credit growth in 2015

Government and GRE net deposits in banking sector fall from Q3’14

UAE Interbank rates start to rise from historical lows with tighter banking sector liquidity

Appendix
“ADCB has a high quality management team. By focusing on improving deposit granularity, increasing the amount of low cost current account deposits, and lengthening funding tenors, the Bank has improved its funding profile substantially since 2008… in addition to its declining credit losses, the improving margins enabled the Bank to enhance its returns.”

“We regard ADCB’s capital and earnings as “strong”. This reflects the bank’s high level of capital, its strong core earnings generation, and manageable dividend payout policy, which enables it to maintain its capitalisation.”

STANDARD &POOR’S

“ADCB is well funded by customer deposits due to its strong franchise…The Bank’s liquidity position is supported by a good stock of highly liquid assets and a very diverse funding mix.”

“Capital ratios have improved significantly over the last four years due to a series of capital strengthening measures, including higher retained earnings.”
