

Takaful and Savings Programme

Shari'ah Compliant Savings Strategy investing in Global markets

Fact sheet for Regular and Lump-Sum contribution contracts

29 June 2018

The Wakeel offers two different Shari'ah compliant Investment Strategies, in which the investable portion of the participant's contributions will be invested: a cash strategy and an equity strategy. The customer will select the strategy or a combination of them, based on his/her risk calibrated needs. Individual outcome is determined by the client's choices.

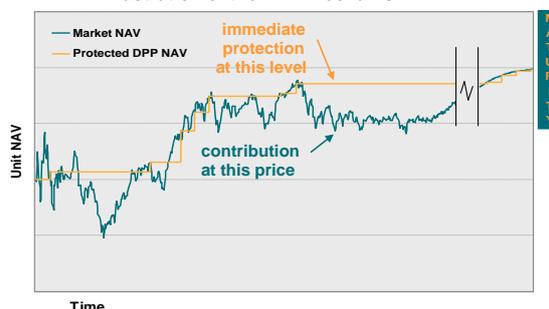

1 Equity Strategy Dynamic Protection Programme (DPP)

Dynamic Protection Programme, introduced on 7th July 2010, is an investment structure built into existing equity strategies. It has been designed to allow for participation in the upward trends of the equity markets whilst offering protection in bear markets. The investment objective of the DPP is to protect the principal invested and to offer a flexible, secure and innovative participation in the stock market growth in full compliance with Shari'ah requirements. Participation in the stock markets is up to 100%, whereby the proven technology systematically reduces market volatility.

Investments are made at market NAV and redeemed at the protected DPP price or market NAV whichever is higher at maturity (minimum 10 years). To secure capital gains, the program locks and secures the price of the underlying equity investments at monthly intervals.

The minimum qualifying term is 10 years. Only customers with a remaining term of minimum 10 years as at 7th of July 2010 and new customers signing up for a minimum contract term of 10 years qualify for the benefits of DPP. ALL contributions paid by qualifying customers (even contributions paid prior to 7th July 2010) are protected by DPP at maturity.

Illustration of the DPP mechanism

Qualifying customers will redeem at the highest Protected DPP NAV at maturity and will have the benefit of buying units during the term of the plan at actual market NAV, which may be lower than the Protected DPP NAV.

Performance – Since inception of DPP on 7 July 2010

as of 29 June 2018

Dynamic Protection Programme Performance

Protected DPP NAV at inception	87.45 AED
Protected DPP NAV at 29 June 2018	100.76 AED
DPP performance	15.21%

The Protected DPP NAV will evolve throughout the term. At maturity the value of the policy will be calculated at DPP NAV or market NAV (whichever is higher).

Market Performance since inception of DPP

Market NAV at 29 June 2018 *	97.16 AED
Strategy performance	11.10%
Benchmark performance	28.09%

(Benchmark is customised to the requirements of the DPP mechanism.)

* price was reevaluated 31 Dec 2010 without any impact on the policy values

iShares MSCI EM Islamic	Blackrock Advisors Ltd. UK	EM: Index tracker offering access to more than 250 mid and large cap companies from Emerging Markets

Manager Commentary

In June, major equity markets exhibited an increased volatility. While US equities maintained its short-term uptrend, European markets extended the losses recorded previous month. The main source of uncertainty was escalated trade tensions as US threats of tariffs were met with vows of retaliatory actions from Europe and China. The losses on the stock market remained relatively small, thus indicating that the narrative of president Trump may be considered rather a negotiating tactics than actual threat. In addition, it is expected that Federal Reserve would intervene should the economy be weakened. Given current its optimistic assessment, Federal Reserve lifted interest rates in June, while signalling that two more increases are likely in 2018.

2 Cash Strategy

The cash strategy is investing in Shari'ah compliant local and international cash equivalent instruments and funds. Investments may therefore consist of Wakala deposits, Sukuk funds, Murabaha placements, cash at sight or any other type of cash equivalent instrument, which the Shari'ah Board approves of. Market NAV at 29 June 2018: 124.89 AED
